WEB	1/2/2011	2/11/2011	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: I am writing to formally complain about SDG&E installing a Smart Meter on my home and refusing to remove and replace it with an analogue meter, following the illness I have experienced which is due to the Smart Meter, according to my physician. I have a doctor letter to this effect. Read the text of these communications at http://www.thecanaryreport.org/2010/12/28/smart-meter-alert/. I demand that the CPUC instruct SDG&E to remove and replace the emission-producing Smart Meter with a non-emitting analogue meter.</p> <p>Utility Comment: They denied the request. See http://www.thecanaryreport.org/2010/12/28/smart-meter-alert/.</p> <p>Request of CPUC: Instruct SDG&E to carry out my request, immediately. Further, institute a moratorium on Smart Meters in CA and allow opting out. CPUC has made a terrible error of historic proportions in allowing this high-radiation emitting technology to be placed on homes and buildings throughout CA.</p> <p>Utility Name: SDG&E</p>

1/5/2011	1/10/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Yesterday the Marin County Board of Supervisors voted to enact a one-year moratorium on the installation of smart meters in Marin County due to significant health and safety concerns related to the use of such meters. Today, my family informed a PG&E installer representative who came to our property that we do not give our permission to install a smart meter at our address during the moratorium. We do not recognize an easement that allows PG&E to install new equipment at our property without our permission. We do recognize an easement that allows PG&E to read existing equipment that was installed with our permission. In addition, I filed a written demand with the Public Utilities Commission that PG&E be prevented from installing such a meter at our property. In addition, I informed the PUC that I am also enlisting the authority of my elected representative to demand that the PUC and PG&E cease attempts to install a smart meter at my property.</p> <p>Request of CPUC: I expect the CPUC to respect the property rights and health concerns of Marin County homeowners and to recognize the authority of the Marin County Board of Supervisors to enact enforceable ordinances to protect the health and safety of Marin County citizens.</p> <p>As such I expect the CPUC to act immediately to ensure that no smart meters are installed in Marin County after January 4, 2011.</p> <p>Utility Name: PG&E</p>
1/4/2011	1/12/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: SmartMeter; I do not wish to have a smartmeter installed at my home. I am concerned about the health risks(even though the Feds say theyre safe)We dont even use a cell phone due to the health risks. Also, I have concerns about the billing & Privacy issues.</p> <p>Were PG&E wants to install the meter is right next to my childs bed in her bedroom. Not Cool.</p> <p>Utility Comment: PG&E documented my phone call. They gave me statistics on the health risk. I still dont want the SmartMeter installed. They said they would try to delay the install, but eventually it will be installed.</p> <p>Request of CPUC: I want the CPUC to not allow the meter to be installed ever.</p> <p>Utility Name: PG&E</p>

1/8/2011	2/3/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I am writing in response to Smart meters and their proposed use in Lake County. I am normally in support of sustainable energy use, but smart meters and pulsed radiation have not had their effects planned for or studied.</p> <p>I am concerned that my rural area is going to be inundated this year by the meters. I think the company just wants to pawn this off on us and the effects have not been studied.</p> <p>Utility Comment: I did contact PG and E as soon as I heard that they were railroading the meters on us. They set up a very nonpublicized meeting at our courthouse which I did not know about it. When I called them, they said the same line of untruths which are in their pamphlet. They said a cell phone has more radiation than a smart meter. That is not true! I really do not wish to compromise my health and that of my family and community for corporate greedy profits of PG and E. They did not give us enough comment time; the announcement of the meeting was never publicly made and it happened right near Christmas. I only heard about it after the fact and word of mouth. These effects have not been studied and are unsafe.</p> <p>Request of CPUC: Set limits on the amount of EMF that people can legally be exposed to! Why has this not been done before? Force PG and E to stop forcing smart meters on their customers for their corporate greed. They are sugar coating the issue.</p> <p>Utility Name: Pacific Gas and Electric</p>

12/20/2011	1/12/2012	Southern California Edison Company	NULL	<p>Complaint / Concern: When a technician from Southern California Edison (SCE) came to my house a couple of months ago to install the controversial smart meter, he did not explain the device and its uses. I feel that SCE did not explain the smart meter probably. Plenty of peer-reviewed information is available that shows its harmful effects on human health causing headaches, mood swings, bloody noses, and even cancer. Me and my family personally have been affected with terrible sleep patterns and constant nagging headaches. As a customer who cares about the health of my family and community I should have the option to revert back to the analog meters. These smart meters also breach my familys privacy giving SCE more information than they need to conduct their business operations. I do not want this smart meter in my house or my community as it not the great "green" technology SCE claims it to be.</p> <p>Utility Comment: Contact the California Public Utilities Commission. I feel this is not an adequate answer. They should allow customers a choice since the smart meters have proven detrimental to human health. I want my smart meter removed immediately.</p> <p>Request of CPUC: BAN SMART METERS IMMEDIATELY STATEWIDE AND GO BACK TO THE ANALOG METERS.</p> <p>Utility Name: Southern California Edison</p>

12/28/2011	1/17/2012	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I am a renter and we have a smart meter on the house for more than 4 months. Soon after it was installed I woke up with severe dhydration and was taken to the ER. It took me a month to recover. Then I got increased weakness and severe allergies which turned into bronchitis which i have had now for more than one month. I have never had bronchitis in my life.I am still weak. this is affecting my life and my work. My landlord lives upstairs. He is in his eighties. Before I speak with him i would like to no what the possible options are.</p> <p>Utility Comment: When i called PG&E they referred me to the utilities commission in Sacramento. The person in charge of smart meters was on vacation. I called back 2 more times after he had returned, left messages and was told I would get a call back which I never did!Another person there told me that PG&E were not mandated to remove smart meters. Just recently I read in the paper that a ecision is to be made about the option to remove smart meters. Below is my opinion.</p> <p>Request of CPUC: PG&E made a mistake & I want myself and other customers to have the option to have the smart meter removed by PG&E and replaced with an analog meter,(not any other alternative meter),at no cost to the customer & in the future there should be no extra cost to the customer for reading this analog meter, no additional costs in any form. As a renter, this would put me in the position to approach my landlord to have this done.He is is a very considerate man. Yes PG&E may sustain some losses but compared to future medical lawsuits my opinion is, better to do this now, look after the health of customers, cut their losses and help meter readers keep their jobs.</p> <p>Utility Name: PG&E</p>

1/14/2011	2/11/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Smart Meters have caused me to have Dermagraphism. In June 2008 we moved to a house in Fremont, CA. During that summer PGE installed the new smart meters. Afterwards, I started to develop skin problems, eye irritations, burning scalp problems, nausea, eye infections, breathing problems. I was tested for allergies and was found to have no allergies. We thought it was the house causing the problems so we moved. The problems still were there. We continually visited our house in Shasta county were there were no smart meters. The problems would go away but always returned when we came back to Fremont. This last Nov 12 I had breast reduction surgery in Menlo Park. Instantly the problems went away. During my recovery, for several weeks I spent my time 24/7 at home never leaving the house. The problems were gone. I started leaving my home for simple errands in Mid Dec. The problems slowly started to come back.</p> <p>Utility Comment: I have not contacted PG&E regarding this as they do not have a reputation for trying to correct a problem. My guess is that they would try to cover up the problem without correcting it.</p> <p>Request of CPUC: On Jan 3 I returned to work with a normal daily routine and the problems are all back full scale. The medical problems can't be because of pollution or weather because there is no pattern that matches bad pollen or pollution days that my skin is irritated. It is whenever I go outdoors.</p> <p>Couldnt PGE set these smart meters to only send wireless information to their satellites in the middle of the night when there are fewer people outdoors limiting the exposure to the wireless waves? The CPUC has a responsibility to investigate the health ramifications of the general public to check to see if in fact PGE smart meters are causing these problems.</p> <p>Utility Name: PGE</p>
1/14/2011	2/11/2011	NULL	NULL	<p>Dr.xxx Hello, I am very concerned about the Smart Meters that have been rolled out. I believe I have a problem with EMF and try very hard not to use cell phones or WiFi. Now this meter is on our hose, 3 feet from our dining room table and I feel powerless to do anything about it. Numerous times I have called PG&E to have it removed, to no avail. What do you suggest? Thank you</p>

	1/23/2011	2/11/2011	NULL	<p>Complaint / Concern: I want to OPT-OUT of having "Smart Meters" installed in my home, either gas or electric.</p> <p>Smart meters are an untested technology that would expose myself and my family to RF radiation. Safe chronic RF radiation levels are by no means established.</p> <p>We do not wish to be exposed to RF radiation. We do not use wireless, cordless, or cellphone technology in our home. Other counties have offered this technology as optional or full-out banned it. My city and county government is not protecting my right to OPT-OUT, so I am writing to you to stop this compulsory in-home radiation.</p> <p>Other, wired technologies can perform the same tasks!</p> <p>Utility Comment: On 20 January 2011, I called PGE at (866) 743-0263 and asked to OPT-OUT of smart meter installation.</p> <p>I was told this was not possible. When I insisted I was referred to a manager, Sandy, who took my personal details and told me she would refer my request to a "Smart Meter Specialist" but that the deferral would only go until the end of the installation period. I told her I wanted to permanently OPT-OUT, but was told this was not possible.</p> <p>I have not heard back from them.</p> <p>Right now business concerns are walloping public health and safety concerns! Only the state government can put the brakes on this bullying. PGE is forcing smart meters down our throats, w/no consumer benefit, and some very serious risks. CA state government should be protecting me and all PGE customers.</p> <p>Request of CPUC: HALT SMART METERS altogether. Scientists around the country are raising serious doubts about the sort of safety claims PGE is making. Google "Sage Report Smart Meters" for a sober scientific consideration of the facts.</p> <p>Any individual should have the right to OPT-OUT, but that does NOT address the larger issues for public health. There are other related issues: for example, immigrants too wary of government to take such a measure to protect themselves as calling to argue with a resistant PGE. Only the CPUC can give this the fair hearing it deserves, and take the actions needed to protect public health and safety.</p> <p>Thank you for your consideration,</p> <p>SF resident and homeowner Utility Name: Pacific Gas and Electric</p>

WEB	1/29/2011	2/1/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I am requesting that PG&E not place a Smart Meter in our home. I am a cancer survivor of four years now, and want to continue living a reasonably healthy life. Presently, I experience bad headaches, balance problems, insomnia, eye irritability, all of which is from the cell phone tower across the street. The rooftop tower was placed without any notice to the neighbors in 2007. I was told the EMF emissions were below the federal standard, thus, announcement of its presence was not necessary. The Smart Meter definitely will place an added risk to my health. I will try everything in my power to stop it.</p> <p>Utility Comment: I have not contacted PG&E yet, but its inevitable that our neighborhood will be targeted soon.</p> <p>Request of CPUC: I am hoping that the CPUC can place a moratorium on Smart Meters until more research is done on the health risks that they pose. We as tax paying citizens of the U.S., and California, should have the right to decide whether we want to have such an installation on our property. PG&Es change over to the Smart Meter for whatever benefits it gives them, is doing so at the risk of making people sick, invading their privacy, and violating Constitutional and legal rights. After the San Bruno pipeline explosion, PG&E lost their credibility.</p> <p>Utility Name: PG&E</p>

WEB	2/1/2011	2/9/2011	Pacific Gas & Electric Company	NULL	Complaint / Concern: Smartmeters. PGE states it will merely "delay" installation. This is unsatisfactory. I have experienced health effects from a newer cordless telephone in the radio/micro range, which was in the room below my bedroom. When I heard such a device at that frequency could disturb sleep, I replaced it with a wired phone, and the symptoms went away. I do not need a study to tell me these things have effects in the microwave frequency. I did not authorize the utility to install a radio/receiver on my home, only to meter my use. Installation exceeds the scope of their easement, indicates an attempt at a contract of adhesion, as well as tresspass. Utility Comment: They said they would "delay" installation, rather than allow an alternative solution.While I am in favor of the energy saving concept, failure to vet, insure, establish safety etc. for the public is a scandal. Request of CPUC: Oblige Pge to self insure to pay for medical costs of Californians; fund independent 3rd party research into radio frequency effects; mandate mitigation of same; allow opt outs in the interim. Utility Name: pge

2/1/2011	3/28/2011	Southern California Edison Company	NULL	Complaint / Concern: Since installing a Smart Meter on my home, my electrical bill has doubled. Even when my family has taken extra steps to REDUCE our electricity consumption, such as install power-bars that can turn off appliances and tech. equipment at night or when not in use. I am also VERY concerned with the research and data about the unsafe EMF levels that are created by Smart Meters. Since installation of the meter, (which is on the other side of the wall from my babys nursery), my son has not slept through one single night in our home. Before then, he slept beautifully, and when we are staying elsewhere, he sleeps beautifully. Utility Comment: The utility told me that the meter readings were accurate and that it must be that we are using more electricity. They were dismissive. Request of CPUC: I would like the CPUC to investigate Smart Meter accuracy and health issues. I would like a normal meter on my home. I would like a choice. Utility Name: Southern California Edison

	2/3/2011	2/9/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: URGENT!! HEART CONDITION- SMART METERS MUST BE REMOVED IMMEDIATELY!!!</p> <p>Please help me before I have a heart attack.</p> <p>A bank of Smart Meters, that emit radiation 24 hours a day, were installed on my home, and I have been severely affected with heart palpitations, non-stop ringing in the ears, shortness of breath, insomnia, and sleep interruption, and more. I posted signs not to install smart meters, but PGE/Wellington illegally trespassed and ignored the signs. I have a heart condition, severely affected by RF radiation, despite calls to PG &E, they have not removed the meters. I am an excellent ratepayer for decades, am low-income and cannot afford to move. This is unjust discrimination, and gross negligence not to allow an "opt-out" of any kind. PG & E knows I have a heart condition, has added more smart meters on my home, and are threatening to double the meters to my home in the next days. Please help me and remove all of the smart meters on my home immediately.</p> <p>Utility Comment: PG &E told me that the CPUC has the ability to have the smart meters removed from my home. I have been an excellent customer for decades, and I have been treated with dangerous indifference, and a complete lack of concern. Their website lists a "Pledge of Safety", and a "code of Ethical Conduct". Is it safe or ethical to demand a customer be exposed to radiation from several smart meters inches from their body 24 hours a day? Is it safe or ethical to ignore severe and debilitating health effects? These are dangerous devices and no one should be forced to endure radiation in their home. Please help me and remove the smart meters from my home immediately.</p> <p>Request of CPUC: Please remove all of the smart meters from my home immediately, and please replace with the old analog meters that worked fine for decades that do not emit RF radiation. How can a utility demand that our health, and safety of our families, be exposed to 24 hour radiation. There must be an "opt-out". Please help me, my life depends on your help. Thank you for doing what is most honorable, protecting the health, and safety of innocent people.</p> <p>"Endpoints that have been reported to be associated with RF*(radiation) include: adult brain tumors, childhood brain tumors, genotoxic effects (DNA damage and micronucleation), neurological effects, immune system dysregulation, inflammatory responses, breast cancer in men and women, miscarriage and cardiovascular effects..." - David Carpenter, MD, Director, Environmental Health and Toxicology, School of Public Health, Albany State University, NY</p> <p>Utility Name: PG & E</p>

	2/7/2011	2/14/2011	NULL	<p>Complaint / Concern: SDG&E installed a "Smart" Meter on my home. "Smart" Meters are known to cause health problems from the radio waves they emit. The "Smart" Meter provides an avenue for the utility to violate my right to privacy by monitoring my electricity usage hour by hour, effectively turning SDG&E into an electronic "peeping tom". "Smart" Meters are known to deliver inaccurate data to the utilities, resulting in inaccurate electricity bills. For these reasons, I want the "Smart" Meter removed and replaced with the old meter. The installer did not notify me before installing the meter, even though I was at home, and when I confronted him, he refused to reinstall the old meter.</p> <p>Utility Comment: SDG&E said that they are mandated by the CPUC to install "Smart" Meters on all California homes and that there is no "opt out" policy. They refused to reinstall my old meter. They also said that ratepayers bills frequently rise after "Smart" Meter installation, particularly when the "legacy" meter was old.</p> <p>Request of CPUC: I want the CPUC to order SDG&E to allow me to opt out of their "Smart" Meter program and to reinstall my old electric meter. If the CPUC is truly an agency that advocates for consumers and not merely a convenient scapegoat for utilities, then I expect you to protect me by preventing SDG&E from forcing me to use this health-harming, privacy-stealing, potentially inaccurate meter.</p> <p>Utility Name: San Diego Gas and Electric</p>

EMAIL

3/1/2011	3/11/2011	NULL	NULL	<p>From: Sent: Tuesday, March 01, 2011 8:18 AM To: Public.advisor Subject: I wish to Comment on Smart Meter Bio-Hazards</p> <p>Attention: CPUC</p> <p>I recently attended a lecture that was a real eye-opener regarding SMART METERS and the real hazards they represent.</p> <p>Smart Meters give off dangerous levels of pulsed microwave radiation in energy bursts 24/7/365. They are part of the evil United Nation's, Agenda 21 program that has to do with their so-called Sustainable Development that strips us of our property rights as well as other draconian issues it presents.</p> <p>What will Smart Meters do?</p> <ul style="list-style-type: none">! Create harmful health changing radiation to everyone - particularly dangerous to children.! Invade our privacy by having Big Brother monitoring your energy use - your movements 24/7/365.! Allow your utility company to remotely shut down your power as they so deem.! Will ultimately require you to change out all your appliances to digital ones that will "talk to Big Brother"! Cause uninsurable consequences if and when a renter sues over health hazards.! Ultimately increase our utility costs as well as create a complicated digital/software nightmare to unravel and fix. <p>I oppose this massive multi-billion dollar program planned for all of California. Why didn't this politically-driven program have to pass any bio/environmental testing like any private business would have to do? This will cause many health hazards and cost the California taxpayers millions of dollars when lawsuits start. Please check out these websites for more info and why you have a moral and ethical responsibility to protect our health and our precious individual rights as outlined in the Constitution.</p> <p>www.refusesmartmeters.com, www.stopsmartmeters.wordpress.com, www.emfsafetynetwork.org , www.nosmartmeters.com</p> <p>This issue just screams out for more investigation. There is so much info out there that has been overlooked.</p>

WEB	3/4/2011	3/30/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: So-called Smart meters are being installed in our area without regard for the valid health concerns, accuracy issues, and other privacy issues, of the devices in question. Good research has been presented to the CPUC, with expert testimony as well as evidence of health impacts from these devices, yet CPUC has failed to halt the process of imposing these devices on people and has allowed inadequate studies to be accepted as conclusive, leaving many open-ended questions. Choosing not to have electricity is not an option -- everyone knows this. Electricity long ago ceased to be a luxury and is now a necessity for life. Please halt the meter installations until civilized discourse can prevail and produce a real solution to these problems. All that occurred so far is CPUC and PG&E commanding citizens rather than taking them seriously. You should serve citizens interests, not the other way around.</p> <p>Utility Comment: There is no provision for halting installation. They are harmless and privacy proof. Implication: my, to me well-founded, concerns are simply wrong.</p> <p>Request of CPUC: Please halt the meter installations until civilized discourse can prevail and produce a real solution to these problems. I want also to have the CPUC, the enforcement arm of our public government, support my personal right to refuse the meter and keep the existing meter or that type of analog meter. If the existing type of meter provides the necessary information for billing, what basis could there be for denying that?</p> <p>Utility Name: PG&E</p>

3/23/2011	3/28/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Smart meters-we want to opt out as we believe the cumulative effect of the radiation is harmful. A "smart meter" tag was tied to our doors (an invitation to thieves who patrol neighborhoods looking for unoccupied units). I called PG&E to complain about the tags on the doors, and was told that PG&E was required to do that and that it had an easement that allowed it to enter on our private property to do anything it wanted. I said I know about easements, which only allow entry to service PGE equipment. I also advised we wish to opt out of SmarMeter, and I was told that no opt-out was possible.(Cont. below in response block)</p> <p>Utility Comment: I cited the order that PG&E provide opt-outs and was told that only people with certain serious health conditions would be allowed to opt-out. I asked for the source of that advice and got nowhere. Finally, the rep admitted that a proposal for opt-out would be released TOMORROW. However, she would not reveal any details.</p> <p>PG&E has been working overtime to force these devices on us, before the opt-out issue has been resolved. They should be stopped. The phone rep was very reluctant to admit that an opt-out proposal was coming. She kept saying no opt-out was possible, under any circumstance.</p> <p>Request of CPUC: Cotact PG&E and require them to provide opt-outs and to advise customers that opt-outs are available.</p> <p>Utility Name: PG&E</p>

3/23/2011	8/2/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Pacific Gas and Electric is not allowing the public to opt out of the Smart meter program. I have filed a previous complaint and spoken to an engineer from the company. He took the line that the technology is safe or no more dangerous than cell phones are, but I do not think this is true. He did not listen to what I said, but was eager to get his points across. I insisted that no agency has determined what a safe level is, and he had no answer to this. I live in a community where Smart Meters are installed when people are not home, and this makes me worried that it will happen to me. I did get my name put on to the end of the list. I think the aims are good but the means are not. I am concerned about health effects of Electro magnetic frequencies when all 120 homes in my small rural area are transponding, even if it is at different times of the day.</p> <p>Utility Comment: They went through the standard defense they do with everyone that Ive heard, that the cell phone and microwave use more of the EMFs. I limit the use I make of these devices and wish to limit my exposure to cancer. There has to be a different alternative, but so far PG and E is not allowing any other options to be considered and is acting arrogant and like a controlling corporate power bureaucracy. The utility said it is safe to be within 6 feet of the meters, but some people sleep (I do) less than 6 feet away from where the meter would be installed. Some people have very small houses. There is a problem with this!</p> <p>Request of CPUC: Put a moratorium on Smart Meter installation, and allow opt outs, contact the federal government and let them know about the problems with their plan. Allow public input of known information and effects of electro-magnetic frequencies.</p> <p>Utility Name: Pacific Gas and Electric</p>
3/24/2011	8/2/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: moratorium on wireless smartmeters immediately, retroactive opt-out immediately w implementation instructions distributed immediately, plus the issue of apartment dwellers and nearby neighbors dealt with somehow. The wireless mesh network is the problem. Health effects are real. This is a huge mess, and should not have been attempted as a wireless network. Pay attention to the people who have been trying desperately to warn you about this for many months now! Go to http://emfsafetynetwork.org/?page_id=2292 to see some of the testimonials of problems. People are suffering.</p> <p>Utility Name: PGE</p>

3/23/2011	7/29/2011	Southern California Edison Company	NULL	Consumer disputes the installation of digital meter for a variety of reasons including health, safety concerns around RF. Sent e-mail to HAW to request this complaint be moved to the Smart Meter Q.
-----------	-----------	------------------------------------	------	---

EMAIL

3/22/2011	7/29/2011	Pacific Gas & Electric Company	NULL	<p>From: Sent: Monday, March 21, 2011 4:18 PM To: Public advisor Subject: so-called "SmartMeters" question(s)</p> <p>Hello,</p> <p>I am writing in regard to what I feel is a coercive proposed (and being acted upon at this moment, as well) action by the corporation Pacific Gas & Electric Company. Specifically I am very concerned about the "SmartMeter" program. I have spoken by phone to several people, at several levels of authority...assumed or otherwise...employed by PG&E. Every person to whom I spoke at PG&E claimed neither I nor any other customer of PG&E had any choice in the matter of "SmartMeter" installation. That "You have no choice" statement strikes me as coercive. It has long been my understanding that coercion is illegal and I have heard of no action changing coercion to legal, must be accepted, people have no choice in the matter. FYI, this letter is intended to convey my sentiment that in no way do I want or need such a change in the way my electrical use. First and foremost I am very concerned regarding health issues involving the (actual quote from a PG&E representative) "new and improved" meter. I do not in any way believe that the "SmartMeter" is any improvement over the system as it was created. I do not believe that, despite PG&E's protestations to the contrary, the meters are in any way safe for the utilities' consumers. I DO NOT WANT THE THING!! Also, for the information of whoever at CPUC is reading this note, PG&E representatives to whom I have spoken over the past weeks deny that CPUC stated a moratorium might be declared against further installation of these new and not improved meters.</p> <p>I am fascinated...similarly to the way a mouse might be fascinated by the motions of a cobra snake...by PG&E's high-handed responses to my many calls to that entity. I am also incredibly sorry that PG&E was allowed to become the behemoth-monopoly it has become. I feel we electrical power consumers would have been better off from the first days of the initiation of PG&E, had we been allowed any choice as to what utility company we would use to warm or cool our homes, keep our foodstuffs from spoiling due to age, and the basic blessing of light when it is needed. As the situation stands now, however, we cannot walk away from PG&E and, instead, use some other electricity-providing company. This is bad, very bad, and is the usual result of allowance of monopolization of any market. In closing to this note, I wish to inquire about a particular thing: I have been told that on March 24, 2011, there may be a hearing somewhere regarding the "SmartMeter" installation possibly continuing...or not continuing, which would obviously be my choice if I were granted a choice...but no one with whom I have spoken either at PG&E or CPUC can advise me as to the location of this possible hearing. I've no idea why PG&E directors were allowed, when CPUC declared it would attempt to place a "No more meter-installation" moratorium on PG&E, to stand and blithely announce that it (PG&E) would not pay one second's attention to such a moratorium if it were so placed. Such action on the part of PG&E is just plain wrong and there is no changing that fact. Please, could someone kindly contact me in regard to the possible March 24, 2011 hearing and let me know 1) whether such a hearing will actually take place, and 2) just where this hearing will be held. This is very crucial to myself and my neighbors; we NEED to know what is going on behind closed doors and we need to know what is going on behind those doors as soon as possible. I apologize for the lack of possible response time to my query. I only heard today, March 21, 2011 that such a hearing might be held. If the information I received was incorrect and there is to be no hearing I am sorry...and I also need to know why there would be no hearing where the general public might be allowed to state its' opinions in regard to this coercive matter. Thank you in advance; the basic idea that these meters will be forced upon us is frightening. I am especially concerned regarding the RF emanations from the meters. The reason I am so concerned about the RF factor is that I have been advised that a person who had ONE meter affixed to his or her home should stay a minimum of six feet away from the thing. What about the people such as myself who live in apartment complexes where banks of 20, 30, 40, etc., meters may be placed on the outer wall of one apartment. Specifically, how far away should a person stay from such banks of huge multiples of meters? One meter, six feet. Twenty meters, 120 feet. Anyone who knows anything at all about the size of most accommodations in apartment complexes will immediately realize it is simply not possible to cover 120 feet away from the effects of a 20-meter bank. I absolutely hope that PG&E will be made to cease and desist regarding installation of any more of the health-endangering meters, and also that its' laborers will immediately begin removing those meters already shoved down the throats of electrical power consumers while giving those consumers no choice and no clear and truthful information regarding the (excuse me, please) damned things.</p> <p>Sincerely,</p> <p>Email contact: xxx</p>

3/26/2011	5/12/2011	NULL	NULL	It is not acceptable to me that you charge people to have your death traps removed. Your proposals don't even address the problem, for just walking down a city street where hundreds of these meters are installed will effect my electrically sensitive body. I want to go on record as being completely opposed to Smart meters. I am also opposed to cell phone towers, cell phones, smart phones, wifi, microwave ovens and anything else that causes unnatrual EMF radiation. It also won't surprise you that I am against all unnatural forms of pollution on our planet. It doesn't take a genius to figure out that this pollution is causing all degenerative diseases including cancer and alzheimer's disease to skyrocket. Surely, as conscious, mature, intelligent adults YOU GET THE CONNECTION. You have no right to annihilate people for money.

3/30/2011	8/2/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I have developed Health problems from Smart Meters installed by PG&E. I am sick only when home, when I leave for extended periods my health problems go away, only to return once more after I have been home again. The problem in my neighborhood is that my neighbors home is but 5 feet from mine and so I get a double dose of the radiation as the bedrooms are all on that side of the house. So if he doesnt remove his, then I am still getting the dose. It is of great concern to me because I am nearing kidney failure, besides ringing in ears, headaches and nausea.....to name a few.(ill spare you the details)</p> <p>Utility Comment: The utility's attitude is that their study says its safe, and all other studies done do not count. They are not taking names of those who are impacted health wise. If only a hand full of people were ill instead of the near 150,000 the moral thing to do would be to get rid of them, no one should lose their life over profit. We can chose to use other things that emit radiation, like cell phones, but there is no where to go, nothing to be done about these meters. I cant sell my home in this economy and move out of state, nor can I afford the fee PG&E plans to charge because of my skyrocketing medical costs due to the meters.</p> <p>Request of CPUC: Force them to remove the meters without our paying the bill. We did not approve the installation, so we should not be forced to foot the bill to remove them. Please do the right thing. They need to remove the meters. They should not have a license. They safety record is abominable. TELL THEM NO SMART METERS!!!</p> <p>Utility Name: PG&E</p>

4/5/2011	9/13/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Mandatory installation of Smart Meters. We do not want the untested, potentially negative health benefits that many other utility customers are experiencing as a result of their Smart Meter installation. We do not feel we should have to pay exorbitant fees for the proposed opt-out program, which will still leave the Smart Meters attached to our home on our bedroom wall. Other utility customers who have had Smart Meters installed have monitored the RF signals and their readings are higher and more frequent than PG&E has stated, meaning PG&Es official statements are (once again) not to be trusted. I am very angry at PG&Es and the CPUCs handling of this mess so far.</p> <p>Utility Comment: PG&Es rep said that the opt-out program was not yet active but she would put as at the end of the deployment schedule for our area. She said the the rf signals on the meters would be active when installed and then someone would have to come out to deactivate them once the opt-out program becomes active, which would mean an indefinite exposure to these RF signals. I was transferred to Wellington, the installer in our area, and was on hold for 30 minutes before leaving a message.</p> <p>Request of CPUC: I want the CPUC to order PG&E to stop all installations of Smart Meters until the opt-out plans are finalized. I want the CPUC to order PG&E to allow customers to retain their original meters, or if already replaced with Smart Meters, have old-style meters reinstalled at no cost. PG&E should be ordered to offer a REASONABLE opt-out plan to have meters read manually of no more than a couple of dollars a month, AT MOST.</p> <p>Utility Name: PG&E</p>
4/4/2011	4/12/2011	Pacific Gas & Electric Company	NULL	Customer opposes the installation of the smart meter. Send emf letter.

EMAIL

4/12/2011	8/16/2011	Pacific Gas & Electric Company	NULL	<p>From: Sent: Sat 4/9/2011 10:03 AM To: Public.advisor; governor@governor.ca.gov; lawrence.cooper@asm.ca.gov Subject: Smart Meter request and information To various government officials,</p> <p>I would like to request keeping my existing analog meter, without paying a fee for a service I do not want and did not request. I can report my energy usage by contacting PG&E monthly and they can verify usage every six months. Forced compliance is not the American way. Additionally, I am writing in support of ASSEMBLY BILL 37 (OPT OUT LAW THAT INCLUDES A WIRED OPTION). Wireless smart meters transmit radiation every few seconds to an average of every 45 seconds, 24/7. This is about 25,000 TIMES PER DAY, 7 days a week (not 45 seconds per day as PG&E claims). It has repeatedly been proven that Smart Meter technology is unsafe and will cause (is causing) health issues that insurance companies are unwilling to insure against. Think about that for a moment. What do insurance companies know that PG&E is not telling the general public? No insurance company would intentionally refuse to accept premiums if they didn't already know that the medical expenses for wireless technology and emf (Electro Magnetic Fields) related illnesses are going to be astronomical. To quote Dr. David Carpenter, public health physician and former Dean of the School of Public Health at the University at Albany, New York: "The evidence for adverse effects of radio frequency radiation is currently strong and grows stronger with each new study." There are documented facts that I am going to paste to the bottom of this email to give you an idea of how dangerous the Smart Meter technology truly is. Your family will be directly affected by the amount of emf in their environment. If you have the opportunity, please do what you can to STOP Smart Meters (whether gas, water or electricity) from becoming a reality. Research is showing that they are not safe for human life. Thank you for your time. I will paste the information below. OPPOSITION TO WIRELESS SMART METERS Thirty-five (35) CA local governments (Cities and Counties) formally oppose WIRELESS smart meters, including San Luis Obispo County Board of Supervisors (3/8/11) and SLO County Health Commission; 10 have passed ordinances (law) prohibiting the meters. San Francisco Chapter of the Sierra Club opposes wireless smart meters. http://stopsmartmeters.org Public Citizen (Ralph Nader's consumer advocate organization) has a national campaign exposing that smart meters don't save energy, just profit PG&E's bottom line. http://www.citizen.org/documents/EnergyInvestmentForumPres.pdf Public Citizen, AARP, Consumers Union, National Consumer Law Center and the National Association of State Utility Consumer Advocates www.nclc.org/images/pdf/energy_utility_telecom/additi The Division of Ratepayer Advocates (DRA), an independent consumer advocacy division of the California Public Utilities Commission (CPUC), and the California Small Business Association (CSBA), a non-profit small business advocacy. http://yubanet.com/california/DRA-and-CSBA-Request-Relief-from-New-Electric-Pricing-Scheme-That-Will-Cause-Disruption-to-500-000-PG-E-Small-Business-Customers.php Indiana regulators rejected the meters: The cost outweighs potential benefits to consumers.</p>

				<p>http://www.businessweek.com/magazine/content/10_39/b4196044842103.htm The Karolinska Institute, Stockholm (Gives the Nobel Prizes) warns against wireless smartmeters, etc.http://www.scribd.com/doc/48148346/Karolinska-Institute-Press-Release The Government Accountability Office (the investigative arm of the U.S. Congress) warns of security risks from cyberattacks—hackers being able to remotely shut off power: http://newwatch.typepad.com/media/2011/01/smartmeter-security-is-a-growing-concern.html</p> <p>Dan Hirsch, Leader of Committee to Bridge the Gap, whistleblower for the nuclear industry: . Warns continuous whole body exposure from a smart meter may be between 160 and 800 times worse than that from cell phones (comparison: whole body exposure from SmartMeter at 3 feet and cell phone at ear).</p> <p>Elihu D Richter MD, MPH medical epidemiologist from Israel "... we are no longer talking about mere precaution of uncertain risk, but about prevention of highly probable and known risks...an unethical exercise... it is now fairly certain that there will be widespread adverse public health impacts."EUROPEAN ENVIRONMENT AGENCY, an agency of the European Union that advises 32 countries on public policy, is calling for FOR LOWERING EXPOSURE TO EMF (Electro Magnetic Fields): "Waiting for high levels of proof before taking action to prevent well known risks can lead to very high health and economic costs, as it did with asbestos, leaded petrol and smoking."http://glossary.en.eea.europa.eu/terminology/sitesearch?term=children+and+emf Dr. David Carpenter, public health physician and former Dean of the School of Public Health at the University at Albany, New York: "The evidence for adverse effects of radio frequency radiation is currently strong and grows stronger with each new study." Top wireless radiation scientists in the world at the Commonwealth Club in San Francisco (11/18/10): CELL DAMAGE, DNA BREAKS and BREACHES IN THE BLOOD-BRAIN BARRIER (increased risks of cancer and Alzheimers) from low levels of pulsed RF signal radiation as emitted by Wireless smart meters: VIDEO - http://electromagnetichealth.org/electromagnetic-health-blog/cc-video/ TREND IN EUROPE TOWARD WIRED and AWAY FROM WIRELESS TECHNOLOGIES: German/French Government advise against wi-fi and French libraries removed wi-fi. Spain removed some cell towers. Freiburger Appeal 2002 signed by 30,000 doctors observe correlation of disease and wireless technologies. Insurance Companies won't insure the health problems from wireless smart meters and do not sacrifice insurance premiums without good reason. TV NEWS VIDEO - (3 minutes): http://eon3emfblog.net/?p=382</p> <p>Wireless smartmeters transmit radiation every few seconds to an average of every 45 seconds, 24/7. This is about 25,000 TIMES PER DAY, 7 days a week (not 45 seconds per day as PG&E claims).</p> <p>Cell phones and wireless smart meters are similar in frequency and wattage. Smart Meters can transmit 1-2 miles per PG&E. However, power density of cell phones is usually 250-300 microwatts per centimeter squared (uW/cm2) when pressed to your head. California Edison's smart meters at 8" away have a peak power density of 229,000 uW/cm2; almost 1000 times more powerful than a cell phone, a radio frequency nail gun, an enormous short pulse...that goes right through walls. Cindy Sage, coeditor of The Bioinitiative Report (www.bioinitiativeverepor.org) states that wireless smart meters are unique in that they transmit 24/7 without shut off and without relief. Humans can recover from significant adversity and stress, but 24/7 pulsed transmissions from wireless smart meters dominates the sleep time for human recovery, and the pulsed signal radiation from the wireless meters dominates the natural bio-electronic communications originating in the brain.</p> <p>http://sagereports.com/smart-meter-rf/?page_id=282</p>
WEB	4/14/2011	8/16/2011	NULL	<p>Complaint / Concern: Since the smart meters have been placed on my home, I have not been able to sleep. My 12 year old son is now also experiencing extreme insomnia. The 2 of us are suffering. I want the meters to be removed. I wake up every night between 3-4 and not unable to return to sleep. My son is unable to go to sleep and tosses and turn all night. This has never been a problem before.</p> <p>Utility Comment: I have contacted them, but I will.</p> <p>Request of CPUC: I want them to alert the public about the health issues these meters can cause and prohibit PGE from installing them</p> <p>Utility Name: PGE</p>

4/21/2011	8/9/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Smart Meter - PG&E is circumventing historic district laws and not going thru historic district planning ordinances. They want to install meters on Cottage Row and they cannot. They state that they have easements right but the ordinance states that any physical structure placed and can be viewed in the public park and public area has to be pre-approved. Also, PG&E is quickly installing these meters before PUC can act and vote to assist the public to opt-out. Many health issues are also a concern and there is too much controversial studies.</p> <p>Utility Comment: Utility company was argumentative and sarcastic. They seem to ignore all concerns and did not tell the customer that you are being recorded. They also will not allow the customer to contact the neighborhood. They are violating freedom of rights. When I mentioned the fires that occurred b/c of smart meters...they ignored it. I dont want another San Bruno disaster.</p> <p>Request of CPUC: TO IMMEDIATELY CONTACT PG&E @ 1-866-7430263 to tell them not to install any smart meters in historic neighborhoods before going thru city attorney review process and also not to circumvent PUC -concern that the customer is not given a chance to opt out of the process. They are spitting on public policy and are demanding that its customer ignore all safety hazards. Please assist.</p> <p>Utility Name: PG&E</p>

4/29/2011	7/25/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Smart Meter Installations. I do not want a smart meter, with or without its radio transmission capability. Many people are already suffering serious health symptoms which began after a smart meter was installed at their home. I have had cancer twice and am disabled by chronic illness; I do not want to be subjected to the significant risk of having a smart meter at my home. Nor do I want anyone else put at risk, especially children, who are the most vulnerable. I also object to the personal information collection that smart meters perform, and I object to the proposals to attach broadband wireless to the smart meter infrastructure and meters.</p> <p>Request of CPUC: Stop smart meter installations. Allow replacement of existing smart meters with analog meters. Allow neighborhoods to be free of the antenna, repeater and collector infrastructure that supports the smart meters. If, instead, the CPUC allows smart meter installations to continue, require an opt out plan that is cost-free to those who choose to opt out. Require removal of smart meters that were already installed where any resident did not want the smart meter, including in multiple family unit buildings.</p> <p>Utility Name: PG&E</p>
-----------	-----------	--------------------------------	------	---

WEB

4/30/2011	7/25/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Smart meters. Its an outrage that citizens are being forced to pay for a technology they dont want and that has a highly questionable efficacy. Why should I and other California citizens be forced to pay the \$2.5+ billion pricetag for this technology that offers little-to-no improvement over the analog meters currently in use? How much ACTUAL energy conservation could \$2.5 billion pay for?</p> <p>Secondly, I am not interested in being irradiated more than I already am. Daniel Hirsch, expert on nuclear policy at UCSC, estimates that Smart Meters can have as much as 100 times more cumulative RF radiation effect than cellphones do. I own a cellphone but am extremely careful about how and when I use it - I consider it a definite health risk. With a so-called smart meter, I have no such choice - Im being exposed to RF radiation 24 hours a day. This is totally unacceptable and exactly the kind of thing the CPUC should be protecting its citizens from, not forcing it on them.</p> <p>Utility Comment: They said that I would have to accept a smart meter.</p> <p>Request of CPUC: Immediately stop all smart meter installations. Permit installation of analog meters to replace smart meters that already have been installed. Allow entire neighborhoods to be free of the antenna, repeater and collector infrastructure that supports the smart meters. Remove all smart meters on multiple family unit buildings when a resident requests it.</p> <p>Utility Name: PGE</p>

WEB

4/30/2011	7/25/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I am very concerned that I will have a "Smart Meter" forced on me. I had to replace my old meter several years ago and am very happy with the new analog one. I believe that it is accurate and safe to use. I feel P. G. & E. as a public service agency and the CPUC as their controlling agent should be providing users with complete and reliable information about the benefits and possible drawbacks of wireless, microwave service. And the CPUC should not be allowing the installation of ANY "Smart Meters" until all possible health issues have been resolved. Importantly, the accuracy of these meters is still in question. Again, none should be installed until that issue is cleared.</p> <p>Utility Comment: In the past, the Company said the Meters must go in. Now in the recent bill there is an offer, with added costs, to disable the "heart" of the "Smart Meter", but install it anyway. I do not want a "Smart Meter." I want to keep my old meter. If the next person who owns my house wants a "Smart Meter", then they can have one installed. I am already concerned about how my neighbors Meters and the Meter Towers will affect me. I do not think the P. G. & E. has done its homework.</p> <p>Request of CPUC: The CPUC, California PUBLIC Utilities Commission, should renew its pledge to represent the very best interests of the PUBLIC with regard to ALL utilities. The current pressure to push forward wireless in any area should be met with caution and time-taking. Wireless in any form should be investigated fully before being adopted as an across-the-board application. I do not believe any "Smart Meters" should have been installed to date and would like the CPUC to insist that those previously installed be removed and that further installations be halted. In addition to the well-stated health concerns that should be researched, I believe that the accuracy (or rather the lack thereof) issue is inherent to wireless. I think this needs to be fully analyzed, but the very nature of wireless, that it spreads and affects other wireless applications, may be without remedy.</p> <p>Utility Name: P. G. & E.</p>

5/18/2011	7/18/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: We are very upset with the installation of a smart meter on our home without our consent. Our world is already environmentally toxic enough without adding more unnecessary technology that could potentially cause serious health issues down the road and for some, is causing current problems. We have pared down our exposure as much as we can control, not counting what we get just "living" in this modern world. To have something physically attached to our home that we cant escape short of moving from the state we were born in is beyond unacceptable. One should feel SAFE in their own home, not afraid!</p> <p>Utility Comment: We were told that there was possibly an "opt out" program coming that would allow us to have it disconnected (though not removed) and have our meter read the old fashioned way for a fee. This TOO is ridiculous that we apparently absorbed the cost to install something we didnt want, and now would have to pay on top of that. We understand the concept, just dont feel its fair. Where is the "customer service" or even the protection of peoples health in all of this? The problem is that youre the "only game in town", so we have NO choice, which were sure works to the companys advantage.</p> <p>Request of CPUC: We would like you to make sure that we have a CHOICE whether or not to have to be exposed to any potential health dangers or not. We should have the CHOICE! This is our HOME for heavens sake! There is very little control people have now a days. Look at the problem some had with the gas explosions last year here in the Bay Area (again, PG&E). We are continuously at the mercy of organizations (including the government, making choices for us that we have NO say in. PLEASE help with this one issue and let us feel safe in our home again.</p> <p>Utility Name: Pacific Gas & Electric</p>

6/8/2011	7/13/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Several months ago the cooperative where I reside was notified that our buildings would not be getting the "smart meters" because we were not equipped for them. We were delighted since none of us wanted them and I in particular breathed a sigh of relief since my bedroom is directly on top of them. We had all been reading about the difficulties people were experiencing with them and about communities banning them. Today a person appeared at my door telling me was here sent by PG&E to install smart meters in the building - no notice to any of the residents previously - he was a sub-contractor from Wellington Energy an East coast firm. I refused to let him do it and one of the other residents, a cooperative board member filled him in on the details of what we had previously been told. and that the coop had voted not to have them here. He left.</p> <p>Utility Comment: I have not called PG&E as yet. I plan to.</p> <p>Request of CPUC: I want these sneak appearances to stop by PG&E or their sub-contractors until the whole issue of opt-out has been made into a reality for us here in northern California and elsewhere. I am appalled by their behavior in this matter. I expect you to contact them and demand that they stop trying to install the smart meters without prior notice and before giving residents a chance to express their dissatisfaction with them and be allowed to refuse their installation in our old buildings without considering our safety and health.</p> <p>Utility Name: PG&E</p>

6/10/2011	6/10/2011	Pacific Gas & Electric Company	NULL	<p>I called PG&E first and this is a Smart Meter. On 6/6/2011 the signal/meter was shut off/replace - the utility terminology. The meter is not providing a signal. PG&E ONLY serves the electric here. So the gas could be Smart Metered by SCG or another company - I will ask the consumer when I call xxx. Michelle in the EO</p> <p>Called a second time.</p> <p>XXX stated new power tools also effect Mr. XXX and she has had to return all power tools given to them. XXX was outside as we spoke (55 degrees) and she was concerned for his health. We discussed the Smart Meter program - briefly.</p> <p>The gas meter is hard wired - does not require a signal - usually means it is connected through a phone line or similar to provide signal to the utility. PG&E used this method on large commercial customers, long before the Smart Meter was in the system.</p> <p>I suggested to xxx to use aluminum foil to cover the area where the Smart Meter is located - she said it was in the living room area. Aluminum foil is not to be used in microwave oven due to it reflective ability. Upon telling her of this idea she wanted to conclude the call and do as I suggested. We closed with her asking my name again and we said our good-bys.</p>

6/10/2011	7/13/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: I get health effects from exposure to wireless EMF. I get bad headaches and also other horrific problems such as pre-cancerous cells. I go out of my way not to be near wireless EMF. When I leased this apartment, I was not aware there was a wireless meter on it. I brought this to my landlady;s attention, she does not want it on there either, nor on any of her properties in the area for that matter. I called Edison to have them remove the meter and replace it with hard wired but they refused and told me they would charge me thousands of dollars were they to do so. Wireless EMF is now officially a possible human carcinogen per WHO/IARC. This meter needs to come off my apartment immediately I then went down to the PUC and met with Robert Ricondo (sp?) of customer service. He was nice but ultimately has been ignoring my phone calls and follow up emails.</p> <p>Utility Comment: They told me they were DEFINITELY putting smart meters on every home and there was no way we could get them taken off unless we paid them thousands of dollars. it didnt matter to them that their wireless meters could cause cancer or that it gave me hath problems. They did not care at all. They told me just to move out of CA.</p> <p>Request of CPUC: I would like the PUC to make them take the smart meter off my home and replace it with a hard wired meter. I would also like the PUC to tell them they cannot put a REPEATER in our neighborhood if many people get their wireless meters removed from their home. Repeaters cause even possibly more unnecessary and dangerous EMF. I also would like the PUC not to allow them to charge one penny extra to people who do not want a wireless meter on their home. Why should anyone have to pay money so that a company doesnt give them cancer? This is tantamount to blackmail. I also would like the PUC to make them inform everyone who has a wireless meter on their home or property or near their property of the serious health effects associated with these wireless radiation emitting devices.</p> <p>Utility Name: Edison</p>

6/16/2011	7/13/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: Southern California Edison Co. is trying to force us to let them install a Smart Meter on our house. They are NOT giving us any options of any kind to opt out. We have lived in this house 42 years and should not have to feel "unsafe" in our own home. Our main concern is actually the "health consequences" of these meters. The Smart Meter would be installed on the wall outside of our bedrooms. We are very concerned about the Electromagnetic Waves that are emitted 24 hours a day going through our walls into our bedrooms. We will not allow this to happen. What gives them the right to subject the public (most of them unknowingly) to this health hazzard??</p> <p>Utility Comment: They have called us 3 times to set up a time to have our electricity shut off so they could come out to install the Smart Meter. We told them, "No, we dont want it." They told us the Smart Meter emits no more waves than a cell phone. That is not true, and they know it. Also, these waves are emitted 24 hours per day. A cell phone does not do that. They said we do not have a choice.</p> <p>Request of CPUC: Please, to protect the public health etc...at least instruct Southern California Edison to cease this enforcement and find a way to allow their customers to opt out. Are you not supposed to be protecting the public? We would be willing to read the old meters ourselves or whatever it takes! We do not feel it is unreasonable to ask that we have control of what is placed on OUR property and have control over our own health. We are not going to sit still and take this. We are considering taking this to the media.</p> <p>Utility Name: Southern California Edison</p>

6/21/2011	7/13/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I cannot live in my own home due to the severe health impacts of Smart Meters! Here are some of my symptoms...<input type="checkbox"/></p> <p>Physical weakness.<input type="checkbox"/> Insomnia—can't sleep.<input type="checkbox"/></p> <p>Balance problems. Foot drop.</p> <p>My face and ears shrivelled. The skin on my arms flaked off in large gobs. Skin sensitivity, pain, sunburn without sun exposure.</p> <p>Heat sensitivity. Deep facial sores and facial pain.</p> <p>Lung dryness and cough. Constipation.</p> <p>Lack of urination (no body fluids to urinate). Kidney (area) pain.</p> <p>No appetite. Foot and leg cramps.</p> <p>Severe cognitive impairment. Memory and concentration problems.</p> <p>Inability to maintain proper body temperature. Nose bleeds.</p> <p>Tinnitus. Teeth/jaw pain. Vision change, ocular migraines.</p> <p>Headaches. Pain in heart, throat, under arms, joints, hands, and body.</p> <p>Utility Comment: PG&E argued anything I said! They said I was ill from my cell phone. I was told the old meters were destroyed so I could not have an analog meter back. When I said I would find an analog meter myself and have it put on (at no cost to PG&E)--I was threatened with arrest! ... Being so ill that I cannot live in my own home vs. being jailed where others must care for me. How is arrest a disadvantage to me? I replaced my meter with an analog. While the house is significantly better I am now too ill for it to make a difference. The Smart Meters on three other houses must be removed. This radiation was measured, and I did everything to shield my house before giving up. ... Currently I live in my car in an area with no Smart Meters and many of my symptoms are better. For example, my vision is almost normal. But today my car was over 100 degrees with the air conditioning running on full. I need my home!</p> <p>Request of CPUC: I expect the CPUC to arrange for PG&E to replace the meters on the houses at XXX, XXX, and XXX in XXX, CA XXX with analog meters. I will provide the meters and electrician if needed, and I am happy to email, call, or send monthly readings to PG&E. The meters at XXX and XXX have been measured and are radiating into my house. XXX Street has been measured to radiate into my front yard and driveway where I must pass to enter my home or pickup my mail.</p> <p>Utility Name: PG&E</p>

6/23/2011	7/12/2011	Pacific Gas & Electric Company	NULL	<p>From: Sent: Wednesday, June 22, 2011 4:28 PM To: Public.advisor Subject: SmartMeter installation threats RE:A.11-03-124</p> <p>I have just got of the phone with PG&E after calling (877) 743-7378 to request that the installation of SmartMeter at my single family residence in San Francisco be put off until at least the utilities commission vote on PG&E's opt-out proposal. The rep told me that she did put me on a list and that I'll get a letter probably in September to inform me of the outcome of the vote and that no matter what I'll be forced to have this meter installed.</p> <p>I am inclined not to trust PG&E any more. In April I got a letter from them to allow entry to conduct regular maintenance. I own this house since 1977 and PG&E never made such a request before. So I called them, turned out it was a trick to make an appointment for the SmartMeter installation. I declined. In May I received another letter asking my cooperation and extolling the virtues of this new meter. I did some Goggling and asked friends and neighbors to educate myself on this subject. The result was negative, spiked bills, health problems, loss of privacy. I read interviews with PG&E director Lee Cox, who said that no one's gas or electricity will be cut off while the concerns of the customers are addressed and a solution is reached, he added that "this is another opportunity to show customers, regulators and others that PG&E is listening closely and taking action to earn back their confidence."</p> <p>This week I got a threatening letter from PG&E, it ignores the upcoming PUC's vote, contradicts Mr. Cox's statements and Quotes CPUC Gas Rule 16, Section A.10 and Rule 11, Section N. In short, the letter states that if I don't let them in, they will cut off my gas and electricity, relocate gas meter and other facilities to an outside area accessible to PG&E at my cost and make me responsible for all costs to re-establish gas service to the premises!</p> <p>These strong arm tactics are down right frightening. I am a single senior lady, I have been PG&E customer for all my adult life, I always paid my bill, was never late and now this! My question is - can they do what they threaten to do? can they cut off my power? can they relocate my meter? can they make me pay for what they elect to do? Can I trust that I was really put on a list where the meter installation will be put off until after the vote? and will I be notified of how this vote went?.</p> <p>I would like to ask the Public Advisor's Office to inform me of the final decision and ask for any help offered.</p> <p>Thank you,</p>

6/28/2011	7/12/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I told them I did not want a smart meter, it is a violation of my privacy and is detrimental to my health! Since having a smart meter I have experienced very frequent headaches, lack of sleep, which i directly attribute to the installation of the smart meter. Before the meter, I had not health problems whatsoever.</p> <p>Utility Comment: They tried to tell me it was the same as cell phone or microwave radiation, which I in turn told them I do not use cell phones or a microwave due to the radiation/ill health effects. I also told them research says that the radiation emitted from their meter is 100 times more powerful than that of a cell phone, and is emitted in a very high frequency pulse much different from a cell phone or microwave.</p> <p>Request of CPUC: CPUC should IMMEDIATELY STOP the installation of smart meters and allow any customer who has them to have them replaced with analog meters at no extra charge! These meters are dangerous, they are not even UL LISTED, and they violate my constitutional right to privacy along with my right to be healthy! This is ridiculous they have even been allowed to be installed without informing the public of the dangers and/or giving them a choice.</p> <p>Utility Name: Pacific Gas and Electric</p>

6/28/2011	7/12/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: A smart meter was installed in my backyard on the wall near my bedroom..I never told PG&E they could enter my backyard..Since the meter has been installed I am having trouble sleeping and mild to severe headaches..I feel this meter is unhealthy to me and would like it removed ASAP !!! I had no problems when I had an analog meter...</p> <p>Utility Comment: PG&E rep. said there was nothing they could do to help me..They refused to change out the smart meter back to analog..They were very un-helpfull and seemed to not care at all...</p> <p>Request of CPUC: I would like my analog meter back and the smart meter taken away..</p> <p>Utility Name: PG&E</p>
6/30/2011	7/12/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Violation of county ordinance. Access point for smart meters has been put in illegally at locations XXX and XXX. Safety issues concerning smart meters have not been adequately addressed.</p> <p>Utility Comment: They had no choice in the matter.</p> <p>Request of CPUC: 1. More research on the potential health hazards of smart meters. 2. Stop PG&E from violating ordinances. There is a moratorium on smart meters here. 3. keep PG&E from installing and disconnecting a smartmeter and then charging me for that.</p> <p>Utility Name: PG&E</p>
6/30/2011	7/12/2011	NULL	NULL	<p>Complaint / Concern: It has recently come to my attention that PG&E is installing wireless Smart Meters without notification or consent of homeowners. Even the World Health Organization has finally admitted that there is ample evidence of the carcinogenicity of the EMF from wireless devices. It is unacceptable that a company could continue to install unnecessary equipment that emits a carcinogen into our homes. Unexpected health problems have already been reported in areas where these have been installed. We do not need to make Americans, who already suffer cancer and heart disease at astounding rates, the subjects of another unmonitored experiment of modern technology. We do need to stop this trend of corporate profits before human health.</p> <p>Request of CPUC: You must step forward on behalf of consumers, and stop the installation of Smart Meters immediately. You must also insist that every consumer have the right to opt out of any such alteration to their meters, including having already installed meters removed, without suffering any penalty or fee.</p> <p>Utility Name: PG&E</p>

7/5/2011	7/12/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: PG&E has rushed into a hazardous and insufficiently researched technology - Smart Meters. This technology has shown itself, in some numbers, to be not accurate, resulting in huge overcharges to ratepayers, There is some controversy over whether Smart Meters have already caused fires in private businesses and homes. The above issues do not address the invasion of privacy that will result from the current Smart Meter technology. Im also angered at the lack of security of my personal information that will result from Smart Meters. The next issue is electronically sensitive people and what happens to them. I hold the CPUC directly responsible for the problems that Smart Meters will cause all utility customers down the line: security of personal information, privacy invasion, health problems, fires</p> <p>Request of CPUC: I want the CPUC to give PG&E rate payers an opt out option that doesnt cost them any extra charges. PG&E is being allowed by the CPUC to force an unwanted, insufficiently tested technology on us for more profit for the wealthy shareholders. This is unconscionable! I want the CPUC to order more adequate testing by outside source, of Smart Meters before allowing PG&E to go any further with their forced installation.</p> <p>Utility Name:</p>

7/6/2011	8/5/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Ever since PG&E installed the Smart Meter I have been having severe Vertigo symptoms like extreme nausea, dizziness, extreme fatigue, ringing in my ears, and unexplained sudden bowel movement. I have had several visits to doctors office and have seen all relevant specialists like ENT, Neurologist, etc. and each gave me an inconclusive diagnosis. The latest assessment from my doctor is that I have Migraine. Im otherwise a very healthy guy and I never have these symptoms when Im away from my house for example, on vacation. The moment I step into my house, I have constant ringing in my hear and constant feeling of lightheaded-ness which sometimes leads to full blown vertigo. Im scared of living in my own house. I feel that Im dying a slow death and my young family , a 5 year old and a pair of twins 2-year old need me for next 20-30 years. Please help save a hard working average American family from falling apart.</p> <p>Utility Comment: Their response was, they cant do anything for any Smart Meters that have already been installed. They cant disable these meters and turn them into manual ones. I even offered them money to take care of this but they refused to entertain my request.</p> <p>In short, they have refused to do anything.</p> <p>Request of CPUC: Please force PG&E to turn my electricity meter into a manual meter that doesnt emit the EMF (Electro magnetic force) while transmitting the data. They would probably have to send someone on site to take the monthly reading. Im willing to pay for this extra cost but I dont want to die this slow death. Please help!!</p> <p>Utility Name: PG & E</p>

7/9/2011	7/12/2011	NULL	NULL	<p>Complaint / Concern: My wife and I are both experiencing significant health problems since the installation by PG&E of the "Smart Meter" in our home and the neighborhood. These symptoms include: increased tinnitus (loud ringing in the ears); feeling of minute vibrations throughout the body; intense tingling in lower arms and legs; severe insomnia due to above symptoms; muscle weakness and fatigue; and involuntary muscle contractions. These symptoms have gotten progressively worse since the meters were installed in our city. We believe the EMF radiation emitted by the meter is the cause of these health problems. We would like the Smart Meter removed as soon as possible and asked the utility if the meter can be removed.</p> <p>Utility Comment: When we contacted the utility on July 9, 2011, I was told that PG&E will not remove the smart meters or take any action to disconnect the radio transmitters until the CPUC takes action on the matter pending before the CPUC. I was told this was "tentatively" scheduled by the CPUC for September.</p> <p>Request of CPUC: The CPUC needs to take action as soon as possible on PG&E's filing regarding policies that outline removal of the meters. September is too long to wait for the people suffering from exposure to the EMF. Resolution of this matter should be the highest priority for the CPUC. In addition, PG&E's proposal to charge customers \$200 for the service of disconnecting the meter is too high. I would think a service call of this nature should cost the company less than \$100. PG&E already has a manual billing system in place so there should be no additional cost related to billing. Thank you. We hope and pray that the CPUC will help the many individuals suffering now from the increased EMF radiation the Smart Meters are emitting in our communities.</p> <p>Utility Name: Pacific Gas and Electric</p>

WEB

7/12/2011	7/26/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I do not want a MANDATORY wireless meter installed on my property. The meter would be installed in my 11-year old daughters bedroom, a small room in which her bed is INCHES from the meter housed just on the other side of an interior closet wall. In Mendocino county our Board of Supervisors voted against installation and yet this ruling is being ignored by PG&E. I called them to request an "opt out" and was told there is no opt out, only the chance to be put on a delay list, and I was told that even being put on a delay list was no guarantee that a meter will not be installed anyway on my property.</p> <p>Utility Comment: I was told by one of PG&Es phone representatives, when I called yesterday (7/11/11) to request an "opt out" status, that there is no opt out and people who are placed on a "delay list" may still have meters installed on their properties. The meters will only be removed if it is ruled we have the right to reject them. This is, according to a CPUC representative — with whom I spoke yesterday following my conversation with PG&E — in violation of the agreement between PG&E and CPUC. Essentially there is no guaranteed "opt out" or even a delay of installation.</p> <p>Request of CPUC: I want CPUC to enforce consumers rights to permanently opt out of SmartMeter installation on their own private property without a change in their service rates. I do not think these things should be installed anywhere until we are clear of the associated health hazards and the public is informed and can make the best possible decision based on this information.</p> <p>Utility Name: PG&E</p>

8/5/2011	8/16/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: The Smart Meter Program is affecting my health. I am very sensitive to EMF, I have been for years. Since the smart meter has been installed I am definitely feeling extremely high levels of dizziness, nausea, headaches, problems with concentration, aches in my jaw, tingling on my face, and muscle aches. I have moved my work area to the opposite side of the home away from the meter but this has not helped. When the Smart Meter was installed the contractor stated that my original meter would be saved and that if I wished to have it replaced then I could simply make the request. Utility Comment: I called the PG&E Smart Meter Division and requested to have the smart meter replaced with the original, or a non-wireless meter but they refused. I even stated that I would be willing to pay a reasonable fee to have the old style meter read manually, however I do not believe this should be the case, but I am willing to do anything to feel better and get rid of this dizziness, nausea and these health problems the smart meter is producing.</p> <p>Request of CPUC: Change the Smart Meter program to a Wired System using the existing phone lines. This wired method is used in other countries and works fine. I dont have a problem with the smart meter program of electrical usage monitoring, however I am opposed to the Wireless Method because I feel effect of the EMF frequencies. I believe that the effects of the Wireless Smart Meter network in All Areas will produce the same ill health effects on my body as well.</p> <p>Utility Name: PG & E</p>
8/7/2011	8/16/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I do not want a powerful radio wave passing through my body every few seconds; the body is also an electrical system and these EMF transmissions are unhealthy for humans and all living creatures. Thank you for this opportunity to express my concerns.</p> <p>Utility Name: PGE; smart meters</p>

8/11/2011	8/19/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I CONTACTED PG&E VIA THEIR WEB SITE ADVISING THEM THAT I DID NOT WISH TO HAVE THE SMART METER INSTALLED ON MY PROPERTY. I WAS NEVER NOTIFIED OF THE DATE OR EVEN APPROXIMATE MONTH OF THE INTENDED INSTALLATION OF THIS METER. I HAVE SERIOUS HEALTH CONCERNS REGARDING THIS METER. I HAVE HAD SEVERE HEADACHES FOR THE LAST 3 WEEKS AND HAVE NOT BEEN SLEEPING WELL. I WAS CONCERNED THAT I WAS COMING DOWN WITH SOMETHING. MY HUSBAND AS WELL HAS NOT BEEN SLEEPING WELL. I RECEIVED MY BILL TODAY AND LEARNED THAT PG&E HAD BEEN HERE AND INSTALLED THIS METER. I WAS NEVER GIVEN AN OPPORTUNITY TO VOICE MY CONCERNS OR PLACE MYSELF ON THEIR DELAY LIST. DIDNT EVEN KNOW THAT THERE WAS A DELAY LIST UNTIL I CALLED AND SUPERVISOR DAVE IN SACRAMENTO SAID THAT I DID NOT CALL THEM AND ASK TO BE PLACED ON THAT LIST. I WISH TO HAVE THIS METER REMOVED FROM MY PROPERTY IMMEDIATELY!! OUR HEALTH IS AT RISK AND PG&E IS RESPONSIBLE. THERE WAS NO OPPORTUNITY FOR US TO TAKE ANY ACTION.</p> <p>Utility Comment: THERE IS NO WAY TO REMOVE IT.</p> <p>Request of CPUC: REMOVE THE METER AND INSTALL THE ORIGINAL ONE AGAIN. GIVE US BACK OUR HEALTH. PG&E SHOULD BE REQUIRED TO BE MORE TRANSPARENT. GIVE BETTER INFORMATION IN A TIMELY MANNER.</p> <p>Utility Name: PG&E</p>

8/18/2011	9/9/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Earlier this month PG&E installed 4 smart meters outside of my house. They did not install them for my account/address because I put in a formal request that they leave my analog meters as-is. Apparently, I will have to pay a one-time fee for this, as well as an ongoing monthly fee, and when I move I will have to pay to have a smart meter installed. This is very unfair. The smart meters installed at my neighbors units are causing serious health problems for my family. We are experiencing constant nausea, headaches, tinnitus, sleeplessness, and difficulty concentrating due to the RFRs emitted by these meters. We feel sick almost all of the time now, and we have always been very healthy people. The meters are also a violation of privacy and a fire danger. They are not UL certified, and were not installed by qualified electricians.</p> <p>Utility Comment: I received no response.</p> <p>Request of CPUC: I would like the CPUC to place a moratorium on the installation of any more smart meters, and to order PG&E to remove all existing smart meters and replace them with analog meters.</p> <p>Utility Name: PG&E</p>

8/18/2011	9/9/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: The so called "smart meter" roll by Edison is misnamed. This device is designed to increase the cost of electricity in order to inflate revenues. The microwave radiation that these meters produce are a health hazard. I know of two individuals, who are extremely sensitive to the frequencies of RF radiation that these meters emit. No opt out program is available and the utility is not insured should these devices cause an exacerbation of the symptoms these individuals experience. There a federal mandate against the installation of surveillance devices without a court order. These devices have no security controls and effectively monitor the specific nature of electrical devices being employed, the time of employment, and duration. This information, used by hackers or the utility employees themselves, provides information regarding whether an account holder is home, when he might be sleeping, what sort of equipment may be in use, etc. This is an invasion of privacy.</p> <p>Utility Comment: They indicate that no opt out plan is available. I informed them that the meter is located on an electrical panel that I installed and belongs to me. I have denied their access to my panel, and it is my intent to prevent the installation of this "smart" meter on my property</p> <p>Request of CPUC: Ban the further installation of these devices</p> <p>Utility Name: Southern California Edison</p>

EMAIL

8/19/2011	8/25/2011	NON REGULATED	NULL	<p>Sent: Thursday, August 18, 2011 5:56 PM To: Public.advisor Subject: Fwd: Smart meters Date: August 18, 2011 5:47:51 PM PDT Subject: Smart meters Dear Bob;</p> <p>I am writing to you with hopes that you would pay more attention to our concerns then all other city of Burbank employees I have reached out the past two weeks. I own and also manage numerous properties in the city of Burbank. I have had meetings with my tenants and neighbors throughout the city and everyone of us share similar concerns about the smart meters forcefully being attached to our buildings. The long term health affects and property values, interference with electronics and appliances, and surveillance without consent is some of the concerns we all have. I sent a letter, made a phone call and sent an email.. With no regard to all my requests for an opt out, those meters were installed despite the fact that I was assured to be put at the end of the list, which was end of October I was told. I spent 20 minutes speaking with a person named Michael (he refused to give me his last name) on August 5 th. He assured me that the property addresses I gave him will go on a delay installation list. I also spoke with Jamie a systems analyst she said she was on 8-17 and assured me again that I would be put on a delay list. Despite all these assurances it seems, they gave it a priority and installed 3 of the units yesterday I was told by my tenant. The water and power has no right to mandate wireless smart meters on my properties when I'm in opposition of their installation. I clearly told them I do not give them consent to enter my property for the purpose of changing the meter. None of the tenants were notified and educated on what's going on. When I told Michael I do not want the smart meters installed on my property,he said I have no say in the matter if I wanted to have electricity in my home. Apparently its a choice of smart meter or no electricity.. Whatever happened to our rights.. Please answer to my question if you can..</p> <p>Sincerely An angry and disappointed resident and customer of Bwp Sent from my iPad</p>

8/25/2011	9/14/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: A "SmartMeter" was installed on my house by a PG&E subcontractor without my permission. I was home when he came without notice to install it. I told the installer I did not want the SmartMeter. He said I had no choice and went ahead and installed it anyway. I have had severe migraine headaches since the meter was installed. Through a lengthy process, many doctor visits and tests, I am certain they are being caused by this SmartMeter technology. I want this meter removed and PG&E wont do it.</p> <p>Utility Comment: When I called PG&E, I was told they cannot remove the smartmeter because they are waiting on the CPUC for approval of a process. I asked if I could hire an electrician to remove it and install an analog meter. I was told I am not allowed to do that since the meter belongs to PG&E.</p> <p>Request of CPUC: Please help me get the SmartMeter removed from my house as soon as possible. Tell me what I need to do to make this happen? Help!!</p> <p>Utility Name: PG&E</p>
8/25/2011	12/5/2011	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: I work from home and have my computer set up in the bedroom next to the Smart Meter. I very often work 8-10 hours per day on the computer. What I am experiencing is a severe burning sensation all over my body, along with stinging and am unable to concentrate or focus to do normal work. I am very concerned that the pulsing of radiation from the smart meter is contributing to my health problem and would like to request its removal.</p> <p>Utility Comment: They sent me some information and said at this time there is not an opt out option but there looks to be one coming down the road.</p> <p>Request of CPUC: I would like people to have the option of having the "Smart Meter" removed. I want mine taken out. We should have the right to make that kind of decision and SDG&E should have warned people of the health hazards prior to installation. Northern California refused the "Smart Meters" initially which is what should have happened in So. California.</p> <p>Utility Name: SDG&E</p>
8/25/2011	12/5/2011	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: A "smart meter" was installed on our house, in replacement of the perfectly functioning existing meter. I am concerned about the health effects of radio frequency radiation. I have small children. I have made efforts to moderate my familys exposure to it from cell phones and wireless technologies. This has been done against my will.</p> <p>Utility Comment: They said it was necessary, would save us money, and that it could not be removed.</p> <p>Request of CPUC: I would like the CPUC to order SDG&E to restore our old meter.</p> <p>Utility Name: SDG&E</p>

WEB

8/31/2011	9/13/2011	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: After their recent installation of a smart meter in my home earlier this month, Ive experienced a myriad of issues pertaining to my health. I havent been able to sleep a full night, constantly waking up in the middle of the night and falling asleep during the day, I have crazy spouts of nausea and numbing headaches that have only worsened. Also, Ive experienced dizziness and severe fatigue thats crippling my daily activities.</p> <p>Utility Comment: The utility company said theyd send someone to measure the RF and EMF being outputted, but gave me no option to opt out of this program.</p> <p>Request of CPUC: Please have my utility company consider an opt out program for individuals like me who are sensitive to such outputs. Ive read up on the literature on the utility companys homepage, but I couldnt find anything that accounted for: the amount of times the smart meter would be in use and for how long, this is confounded by the number of smart meters that are close to me vicinity (my neighbors). Though I know only one can be activated at one time it needs to be pointed out that they are not accounting for the levels be outputted by other devices within my general area. Also, there hasnt been any study documenting the EMF output on EMF sensitive individuals in regards to the smart meter. EMF sensitivity can be crippling if it is happening on a daily basis. Please inform the utility company of this and allow me to convert back to my old analog meter.</p> <p>Utility Name: SDG&E</p>
8/31/2011	9/13/2011	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: It has been proven repeatedly that "Smart Meters" are a danger to the health and welfare of humans and animals. Yet, SDG&E is saying that your organization has mandated that these be attached to our homes in San Diego. We all know that theyre using this excuse to save money. Period. The fact that the radiation emitted from these "Smart Meters" is causing real health problems and no one is doing anything to remedy the situation is very disturbing. I want the opportunity to opt-out of this meter on my home. I spend at least 5-6 hours a day working from my home approximately 2-3 feet away from our "Smart Meter" which is located directly behind my computer screen on the outside wall of my home office. In addition to my neighbors meter which is only a few feet beyond ours. I dont want them there!</p> <p>Utility Comment: We cant remove them.</p> <p>Request of CPUC: Please tell SDG&E that they need to include an opt-out program for homeowners. We need to have control of the equipment that we choose to put on our own homes.</p> <p>Utility Name: SDG&E</p>
9/1/2011	12/5/2011	San Diego Gas & Electric Company	NULL	<p>Consumer cites health concerns as the reason to wanting the Smart Meter removed. Consumer states the meter was installed on the wall directly above his kid's bed. Referring case to HAW.</p>

	9/16/2011	1/6/2012	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: My husband has Parkinsons, and I have neurological disorders yet we were active and felt good. In April, 2011 we moved in with my elderly parents to help them. Immediately we experienced buzzing in the head, body jolts, depression, fatigue I can only describe as "deathly". My neurological symptoms, before completely under control, were back! Burning feet, cramping, anxiety, depression. My husband complained daily. Then we opened up stuck windows in our bedroom, and outside, at the head of our bed was an electric meter. OMG! Was it one of those "Smart Meters"?? Ive always avoided all forms of EMR, distancing myself from that which I must use (e.g., a computer), I never put a cell phone to my head. I even lay it down to use the speaker. I used my EMR meter and found the "Smart" meter was emitting EMR the same level as if Id gone to bed snuggled up to my old computer. We now know its worse than that. Were miserable. We want the analog back, and we want it back YESTERDAY.</p> <p>Utility Comment: They told us we didnt have the option of getting back the analog. And if we wanted it moved off our bedroom wall WE would have to hire the electrician to do it, and that was AFTER paying SDG&E \$1,500 to "study" it first (something about old wiring).</p> <p>Request of CPUC: We absolutely NEED this monstrosity removed from our bedroom wall, and the analog put back. If it isnt done by SDG&E, well take matters into our own hands, and protect our property as is our right, from anyone coming on the property in the future after taking the stupid meter off. We would expect CPUC to protect our right to protect our health - by protecting us FROM SDG&E.</p> <p>Utility Name: SDGE</p>

9/23/2011	1/11/2012	Southern California Edison Company	NULL	<p>Complaint / Concern: Installed a smart meter 9-22-2011. It is effecting my health. It is very hard to take the physical effect it is causing me. I cant sleep with this effect in my head and nervous system. Need help Edison is not concerned about me or what the smart meter is doing to me. Thinking about turning off the electric but that creates a lot of other problems for us. Want to go to another company for our electric but Edison says we cant do that.</p> <p>Utility Comment: They cant do anything for me. They wont take out the smart meter. I tell them it is bothering me and making me sick right now as we talk and they say they care but cant do anything and in the true robot like way Edison responds they say have a nice day. I tell them am not going to have a nice day as long as I have this problem.</p> <p>Request of CPUC: Help me get the smart meter removed. We have been good paying customers of Edison for over 20 years at this address. We havent asked for anything but to not have this smart meter. This is a deal breaker and show no concideration of me or my health. We are treated like cows. I will never feel the same about Edison again.</p> <p>Utility Name: Southern California Edison</p>
9/26/2011	1/11/2012	Southern California Edison Company	NULL	<p>The consumer opposes the installation of the smart meter due to health, safety and privacy issues. Wants opt-out option without charges. Sent smart meter closing letter.</p>
9/27/2011	10/26/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: SCE has given notice to begin conversion to ("Smart Meters"). I am against this action because: I have health concerns ofthe radio frequency (RF) hazards on my property. 2. This is an invasion of privacy. 3. I am currently a "net metering" customer with photovoltaic solar panels on my roof and produce more power than I consume monthly. The "Smart Meter" does not run backwards and therefore recognize the excess energy produced by on-site solar systems.</p> <p>Therefore, until SCE can develop a Smart Meter that has gone through rigorous safety testing that concludes there are no ill-effects to long term exposure from the metering device, and that the Smart Meter will have a way to deal with on-site power generation from photovoltaic solar systems (or other energy producing systems), I demand to not have a Smart Meter installed on my property.</p> <p>Request of CPUC: Mandate an Opt-Out option for customers of SCE, PG&E and other electrical providers.</p> <p>Utility Name: Southern California Edison</p>

9/29/2011	11/22/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: I demand that the CPUC rescind its mandate for the implementation of Smart Meters. Installation is being forced, and many consumers are allowing it, because there has been inadequate investigation into the health and privacy concerns, and there has been no education of the public. Instead its being rolled out under the auspices of "greener" technology. Sounds more like martial law. Southern California Edison already has a monopoly in my area. My choice, then, is to suffer adverse health effects or live in the dark.</p> <p>Utility Comment: At first we were threatened that SCE/Corix would come back with law enforcement. My mother was able to get her home on a delay list. My next door neighbor, despite having a sign, was not home when Corix came again to deal with "resisting" customers. They installed it anyway. I was lucky to save the one on my house. Only two days later SCE suddenly has an opt-out list. It was too late for my friend. Shes being told she can have the unwanted Smart Meter "powered down". If too many people opt out, the utilities companies have vowed to put a repeater in your neighborhood which boosts the signal and emits even more intense radio frequency radiation!</p> <p>Request of CPUC: I want the CPUC to favor the consumers! Restore the analog meters. The recommendation from the Department of Energy was a mandate only for buildings under explicit federal jurisdiction. Why did the CPUC issue a mandate to the utility companies then? Who stands to benefit from this? Surely not consumers? Perhaps the tax coffers and the manufacturers of Smart Meters?</p> <p>Utility Name: Southern California Edison</p>

9/29/2011	10/31/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: After watching President Peevey tell that he could have his analog meter back, I called PG&E and stated that I too was having health problems after the installation of the smart meter and I wanted an analog meter back on my home. The customer support person told me that PG&E no longer installs analog meters. I had an analog meter and because PG&E said they wouldnt, with assistance I installed one Sept 24, 2011 @ about 11:30am. I took the smart meter to the Santa Cruz Sheriffs dept to turn it in. I attempted to hand it over to the sheriffs office for safe keeping until I could get PG&E to come and take it back. They refused to accept it.</p> <p>Utility Comment: Yesterday A representative from PGE named James said that I had to have my existing meter put back and that an emergency order for this to be done had been generated. He said I had broken a law and would be contacted by Revenue Assurance about this because I was now stealing electricity. I waited all night for them to show up. They did not. I have now been contacted by Lonnie Wilson and have been told that I had broken federal law and that that my power would be shut off. I would also have to pay for and inspector to come out and for a technician to reinstall the smart meter. Mr. Wilson said that the smart meter that is at my house in a box might have been tampered with and was no good anymore. Also because the analog meter I had did not belong to them it was useless as well. I am now waiting for the investigation dept to contact me.</p> <p>Request of CPUC: Dear President Peevey,</p> <p>I would like for the analog meter to remain on my home. I would like the threats from PG&E to stop. I would like to have my electricity kept on.</p> <p>Utility Name: PG&E</p>

WEB

10/10/2011	10/17/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: NO SMART METERS IN IRVINE, CA- Utility companies have already begun to deploy wireless Smart Meters despite the fact that San Franciscos City Attorney and multiple cities, counties, and towns have formally petitioned for an immediate moratorium until adequate investigation of the faulty and inaccurate meters is completed. Their peak power pulses repeat at least every one to two minutes as they gather and relay energy data from house to house throughout the day and night. In light of the growing number of people with electromagnetic sensitivity and the fact that children, the elderly, and those with chronic illness will be most adversely affected, and, the lack of FCC safety standards for chronic long term exposure to RF radiation. From global scientists, environmental agencies, advocacy groups and doctors, We call for immediate use of the precautionary principle for wireless technology.</p> <p>Utility Comment: SCE THERE IS NO OPT OUT LIST - MY COMMENT "INSTALLING SMART METERS WAS FROM MY UNDERSTANDING - BY REQUEST ONLY - I DID NOT REQUEST IT AND IM SURE MY ENTIRE CITY DID NOT REQUEST IT. THE UTILITY COMPANYS ARE TAKING ADVANTAGE OF PEOPLE. THIS IS WRONG. THESE ARE BEING FORCED ON HUMANKIND WITH BOGUS REASONS. WE ARE NOT STUPID - THEY ARE BEING INSTALLED FOR MONEY, POWER, CONTROL AND AT THE EXPENSE OF ALL LIVING THINGS. WHAT HAPPENED TO SERVING GOD OUR CREATOR?"</p> <p>Request of CPUC: To continue to add Smart Meters to our environment would be adding yet another layer of wireless radiation and without enough knowledge about the significant outcome and impact to human life and all living things would be deemed unconscionable. I request immediate consideration on this urgent matter. 1. Place an Immediate moratorium on all new wireless installations to allow time for a thorough independent and transparent scientific review.</p> <ol style="list-style-type: none">2. Thoroughly investigate the utility companies Smart Meter proposals and potential health risks of these devices by holding public hearings.3. Require utility companies to submit a characterization study of the smart meter system. What is the evidence that smart meters are safe?4. Offer only those customers who REQUEST a smart meter to be installed. <p>Thousands of signatures have already been turned in on similar petitions to the CPUC and to government officials of Sonoma, Santa Cruz, Alameda, and San Francisco Counties.</p> <p>Utility Name: Southern California Edison</p>

10/10/2011	10/18/2011	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: The Smart Meter was installed on our house last August. Since that time, I have had unrelenting and disabling headaches, insomnia, heart irregularities, and unusual short-term memory loss. (I am an engineering professor, and I used to have exceptional short-term memory, until the Smart Meter was installed.) The Smart Meter has made me EMF sensitive, and has ruined my life, simply put. I am not able to be in the house and take care of my elderly father, I have had to sleep in my car, I have been homeless. (Thats why I have a PO Box - because I cannot stay in the house regularly.) The destruction of my health and the destruction of the safety of this house - a house that Ive lived in for 50 years previously, without problem - is because of the Smart Meter. My physician can document that these adverse and disabling health effects are because of the Smart Meter.</p> <p>Utility Comment: They said they could not and would not remove the Smart Meter. They also said it was "safe." It is definitely not safe.</p> <p>Request of CPUC: I want the CPUC to instruct SDG&E to allow customers to return to their analog meters, and to remove the Smart Meters. It is not good enough to just delay Smart Meters for new installations. They need to also allow customers that already have Smart Meters to have them removed. They also need to allow the neighbors of disabled customers (disabled by the Smart Meters) to have their meters removed, because a neighbors Smart Meter can have hazardous effects in nearby homes.</p> <p>Utility Name: San Diego Gas and Electric</p>
10/11/2011	10/18/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: Smart Meters - Am opposed to these due to electromagnetic and radio frequency energy contamination. No studies have been provided disputing the negative effects on human health. Additionally, no adequate disclosure has been provided regarding the transmission capabilities of the meters, or the extend of the data that will be recorded, stores and shared, or the purposes to which the data will and will not be put.</p> <p>Utility Comment: We have been put on an "opt out" list. The meter has been installed and supposedly at this time is not transmitting any data. Have not had this confirmed by a third party.</p> <p>Request of CPUC: GIVE HOME OWNERS THE OPTION TO PERMANENTLY OPT OUT. IF ADDITIONAL COSTS ARE REQUIRED, THE HOMEOWNER WILL ASSUME THEM.</p> <p>Utility Name: Southern California Edison</p>

LETTER	10/11/2011	11/22/2011	Pacific Gas & Electric Company	NULL	The consumer opposes the installation of the smart meter due to health issue. Sent smart meter closing letter.
WEB	10/12/2011	10/19/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: My complaint has been a year long struggle with Southern California Edison who installed a SmartConnect on our house without notifying us prior to us moving in. We purchased our house in full and do not appreciate this being done without our consent. As compared to our prior residence it is clear our electric bill is higher and my Wife has been seeing a doctor for a year now as a result of the medical effects caused by this meter on the other side of the wall in our bedroom.</p> <p>Utility Comment: I have called almost once a month and have spoken to several supervisors at SCE concerning this issue. On one occasion a customer serviced representative threatened my wife with being charged with a felony and sent to federal prison. I spoke with the supervisor of that employee and found out that was a false claim by the employee. They told me there is no Opt-Out option and only a waiting list. Most times the individual I would speak with was condescending and was very difficult to try and discuss this with.</p> <p>Request of CPUC: I am a disabled Combat Veteran who does not feel this treatment to me or anyone else who is a customer of SCE deserves to be treated as second rate citizens with no option in regards to a device that is so controversial. I respectfully request CPUC to use its power to either get SCE to create an Opt-Out list as soon as reasonably possible or contact them to reinstall the analog meter on the home we own. Thank you</p> <p>Utility Name: Southern California Edison</p>
WEB	10/13/2011	10/25/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: Last year a Smart Meter was installed without my consent on my property while I was not at home. I have been having health issues ever since. I want the Smart Meter removed and an analog meter put back in its place. Smart Meters are a carcinogen, they are not UL-certified and I am within my rights to request that it be removed immediately.</p> <p>Request of CPUC: Smart Meter removed immediately and replaced with analog</p> <p>Utility Name: SCE</p>

WEB

10/13/2011	10/28/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: I do NOT want a smart meter installed on my house because it emits harmful levels of RF radiation, as much as a cell phone tower. Edison installed a smart meter on my home, just under the bedroom where my son sleeps. Edison installed it WITHOUT MY CONSENT and WITHOUT NOTIFYING ME beforehand. I would have NEVER agreed to this had they asked, because I feel it is harmful to my familys health.</p> <p>Utility Comment: They said they couldnt remove it until you, the CPUC, made some sort of "ruling".</p> <p>Request of CPUC: I want the CPUC to complete your "ruling" and order Edison to allow residential customers to OPT OUT of the smart meter installation, even if it is already installed.</p> <p>Utility Name: edison</p>
10/13/2011	10/21/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Refusing to get the new "Smart Meter" installed on our premises. We object to this because of privacy and health issues.</p> <p>Utility Comment: I was placed on "Delay list" with notes stating to opt-out on getting the Smart meter installed at my house.</p> <p>Request of CPUC: Make the "Smart Meter" an option and not mandatory.</p> <p>Utility Name: PG&E</p>

WEB

10/14/2011	11/15/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: you please to, at best stop all smart meter installation and at least to allow for an opt out.I have requested SCE several times not to install a smart meter on my home meters. Smart meters emit EMF waves and monitor my energy usage without my permission. EMF waves will penetrate three feet through an exterior wall INTO MY HOME, as stated by the SCE customer service representative and further outside when not blocked. EMF waves, as stated by the World Health Organization are likely cancer causing. They certainly disrupt our health on a cellular level. Headaches, body aches, foggy thinking as well as other symptoms are widely reported with EMF wave exposure - especially near smart meters. I have requested SCE several times to leave the current meter on my home and not to install the smart meter. SCE told me that I smart meters are a fact of life, period. multiple meters within a small area. I ask please to stop this.</p> <p>Utility Comment: SCE stated that I have no option other than to accept their smart meter. I have tried to explain many times over to the customer service representatives that I will not allow a electrical device on my home that emits strong EMF waves on an hourly bases (as detailed by SCE) around the clock. SCE customer service representatives have told me time after time that I cannot reject a smart meter. There is no opt out.</p> <p>Request of CPUC: I would like the CPUC, at best, to halt all smart meter installations. Second best I would like CPUC to at least offer an opt out so people can retain their current metering system. Presently, according to SCE, my meter emits one radio pulse per month, when requested by a meter reader from the road. This system works perfectly. Smart meters are another source of electronic pollution which is now engulfing in our daily lives. We ALL are at risk of this added electronic pollution. I hope you will take this into consideration for yourself, your children and your grandchildrens health and well being. EMF waves affect us physically and psychologically. This is a proven fact. Please help with this situation. It is insane what is being forced upon us.</p> <p>Utility Name: Southern California Edison</p>

10/21/2011	11/17/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: Since SCE installed their new "smart meter" a few months ago my electric bill went up more than 50 percent and I am having health issues such as diarrhea all the time and also their equipment is creating a drone sound which SCE hasnt been able to hear with their deaf ears. I have complained to them over 50 times in recent years. When we first moved up here to Hesperia in 1971 they had all kinds of fancy equipment on their post out in front of my house which my folks complained about because there was a loud rumbling noise coming into the bedroom wall. So, SCE installed a smaller post in our driveway to alleviate some of the noise. In 1991 or 92 they removed the fancy equipment and all the noises stopped. Now again, in 2008 they reinstalled the same conglomerate of equipment back onto the post out front and the noises started up again even with the smaller post in the driveway.</p> <p>Utility Comment: On the post noises they claimed they couldnt hear them. On the new meter they claimed the new meter is accurate.</p> <p>Request of CPUC: Whatever you think you can do.</p> <p>Utility Name: Southern California Edison Co.</p>

10/21/2011	11/16/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: I am very concerned about some health changes that we have noticed since the Smartmeter was installed. My husband has been having tinitis issues, my daughter has had bouts of vertigo, all of us have sleeping issues, and Ive been suffering from terrible headaches. Our meter is located outside our master bedroom window, just feet from where my husband and I have our heads on our pillows. My neighbor has also been suffering debilitating bouts of vertigo and unexplained health issues. Both of us have our Smartmeters within feet of each others homes. We BOTH are very concerned about some of these health issues. We would hav really appreciated knowing some of these things happened to other people before the meters were installed. Apparantly, they have been banned elsewhere in the state.</p> <p>Utility Comment: They took my name and info for a "possible" opt-out list.</p> <p>Request of CPUC: I just would like the opportunity to have the choice of having this meter. I would like to have the meter removed and have my analog meter back. I dont think we should have to pay for it to be removed since we were never informed that there could be a possibility of health issues. All I know is we are having issues we did not have before these meters were installed. I think Edison knew this, but never mentioned it and we did not have the choice to "opt-out" before they were put in.</p> <p>Utility Name: SCE</p>
10/21/2011	11/16/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I would like PG&E of offer an inexpensive opt out option for the Smartmeters. I have health and privacy issues about the new Smartmeters. PG&Es Smartmeter pamphlet does not mention the electromagnetic radio frequency pulse that have been labeled a class 2B carcinogen by the World Health Organization. The pamphlet is misleading.</p> <p>Utility Comment: I am currently on the delay list waiting for the opt out program.</p> <p>Request of CPUC: Tell PG&E of offer an opt out of the Smartmeter program at little or no cost to the customer.</p> <p>Utility Name: Pacific Gas & Electric</p>
10/23/2011	11/16/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: our analog electricity meter has been replaced without our permission with a smart meter, which produces pulsed radiofrequency (rf) radiation. rf radiation has been documented to create health hazards and im concerned about the health and safety of my children.</p> <p>Utility Comment: i havent contacted them yet. although neighbors that are also concerned have stated that sce shows no care and tells customers its not possible to go back to the analog meters.</p> <p>Request of CPUC: compel sce to put the analog meter back that its employee removed without authorization from the property owner.</p> <p>Utility Name: Edisom Company</p>

WEB	10/28/2011	11/9/2011	Southern California Edison Company	NULL	Complaint / Concern: I DEMAND THE ANALOG BACK. I DO NOT GIVE MY PERMISSION TO HARM MY HEALTH AND INVADE MY PRIVACY. Utility Comment: On 10/24/11 when I called Polly in the SCE Smart Meter Dept. at: (800) 810-2369, asking for certifications & approvals from FCC, FDA, UL [Underwriters Laboratories], etc., I was told that is proprietary information & NOT available to me. She tried to assure me that everything was approved by authorities but does NOT know for certain.... Request of CPUC: GET MY ANALOG METER INSTALLED BACK IN THE SMART METERS PLACE ASAP! Utility Name: Southern California Edison

WEB

10/28/2011	11/9/2011	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: I do not want the smart meter on my property. I have both health and privacy concerns about it. I have a lot of health sensitivities and can provide a great deal of evidence that the original FCC safety guidelines do not apply to the virtually continuous irradiation by the smartmeter. Further, the smartmeter raises privacy concerns including allowing someone to hack into my meter to see when I'm not home; and we know utility companies are apparently considering selling personal information derived from the smartmeters for their own profit. Recently I watched the video of Michael Peevey, president of the CPUC, stating in an open meeting on 9/22/2011 that "you can go back to the analog meter, if that's your choice." His statement is here: http://stopsmartmeters.org/2011/09/22/cpuc-you-can-go-back-to-the-analog-meter/ I want this dangerous transmitter off my property, I deeply resent being an involuntary guinea pig for this technology.</p> <p>Utility Comment: 1st email: "smart meters are mandated by the PUC" 2nd email: what Peevey said does not apply to SDG&E. 10/28/11 phone call from Miss Gonzales, supervisor at SDG&E (858) 636 1942: she explained that SDG&E does have a mandate from the PUC and that this has not been amended to allow replacement of my smartmeter with the analog meter. I asked her to reprogram my meter to transmit only once a month, she said this was not possible. I told her I would shield the meter and open it for transmission on or before a given monthly date. She said they would remove the shielding. She told me to call you.</p> <p>Request of CPUC: Please tell SDG&E that they are to replace the smartmeters with analog meters or something that does not pose a health concern and something that does not provide personal information such as times when I am not at home based upon electrical usage. This must be done at NO COST to users since we never agreed to have the smartmeters installed in the first place. Ideally these dangerous, insecure devices should be replaced throughout San Diego County, but at the very least at customer request. Thank you.</p> <p>Utility Name: SDG&E</p>

WEB

10/30/2011	11/16/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Five Smart Meters were recently installed 12 inches from my bed, on the other side of my bedroom wall. Four of the meters are to read neighbors consumption, who reside within safe distance from the meters. My concern is the proximity of my bedroom to the RF of 5 meters; I would not be concerned if "safe distance" and "amount" were considered by PG&E. Recently, Ive had documented health problems. My doctor inquired about environmental changes. I then considered the source to be the Smart Meters. Problems include: increased heart rate, tinnitus, sleep problems. None of these issues occurred previous to Smart Meter installation. I believe the proximity of the 5 meters exceed safe limits. Perhaps one Smart Meter near one residence is safe. However, five Smart Meters 12 inches from the location of my bedroom is excessive in light of valid RF research. (please note: I cannot relocate my sleeping place due to the small size of the apartment, and bedroom.)</p> <p>Utility Comment: "There is no health impact, even with 5 meters at that distance of 12 inches." (exact words)</p> <p>Request of CPUC: I would like the five Smart Meters to be redistributed, to be placed within safe distance of my sleeping area. To have five Smart Meters on the other side of the wall to *my" residence, exposes me increased RF. I do not want to be exposed to RF. PG& E will not allow me to "opt out" and even if I did, Id still be exposed (in 12 inch proximity) to four neighbors Smart Meters. Since I own the condo, I am not able to simply give notice and move to another place. PG&E has narrowed my options to care for health, has created problems for my life, and has left me with no recourse. I want all five Smart Meters taken off my bedroom wall and redistributed to a safe area away from residence. (please note: I was referred to this agency by my medical doctor.)</p> <p>Utility Name: PG&E</p>

10/31/2011	11/9/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: When I returned home from being out of state for 2 weeks I found a "Meter Upgrade Attempted" Sorry we Missed You doorhanger on my door. Despite this, my analog meter was indeed replaced by a SmartMeter even though I did NOT want a SmartMeter. The Energy Policy Act of 2005 only mandates utilities to "offer" them and to install them "upon customer request." I am concerned about the health hazard posed by the SmartMeters which are operating on pulsed RF radiation coming into the home every 3-6 seconds. According to the World Health Organization SmartMeter radiation is a Class 2B carcinogen. I have other concerns, but this is my primary one.</p> <p>Utility Comment: I called SCE on October 20th. I was advised that there is now a "Delay List," which is obviously too late for me, and an "Opt Out Interest List," which I think exists merely to placate consumers. While I did place my name on this latter list, I really do not expect SCE to take any action without being forced to do so. The SCE receptionists do not seem to take these health hazards very seriously.</p> <p>Request of CPUC: I want the CPUC to demand that SCE remove the SmartMeter and replace it with my old analog meter.</p> <p>Utility Name: Southern California Edison</p>

11/4/2011	11/23/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: Southern California Edison started installing Smart Meters in our Turtle Rock/Turtle Ridge neighborhood on October 17, 2011. Neither we (nor a great many of our neighbors) received or saw any notice from SCE. Most people missed the opportunity to get on the delay list. A few of my neighbors were on the delay list, but Edison installed the meters anyway. This is because Edison created a delay list to the delay list, i.e. a 7 day waiting period before the persons name on the delay list would be activated. This, in effect, allowed Edison, to ignore the order that the PCUC gave, that customers would have a right to be on the delay list.</p> <p>I am not only worried about health effects of my family being exposed to the 24/7 RF radiation from (continue via attachment)</p> <p>Utility Comment: They told me that right now the meters cannot be removed even if my neighbors call because them is non optional. My neighbors can get on an opt out list. However, during that wait period, my family is still being exposed to pulsed radiation and I am concerned about the health issues.</p> <p>Also if I shield my property with a screen this may reflect RF back onto my neighbors property, which I dont want to do as one of my neighbors has small children.</p> <p>Request of CPUC: Remove Smart Meters and replace with safer Analog meters. Allow customers to have an opt out. Allow customers who are affected by their neighbors meters to request a neighborhood opt out.</p> <p>Utility Name: Southern California Edison</p>

11/5/2011	11/21/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Smartmeter Radiation</p> <p>I recently moved home from New York on the third week of September. My laptop computer was sited in a position where the wall directly behind me held the Smartmeter. I noticed immediately that my ears would have a buzzing sound all the time, but when I left the house to go elsewhere it would diminish; I thought it was just me. This never happened in New York at all. Today, I read about it and realized what was going on and have since moved my laptop. I am positive that this SmartMeter constitutes a health risk and legal liability and I am EXTREMELY upset that I have been exposed to this radiation without my consent or knowledge. I am also upset that the presence of the SmartMeter effectively denies me use of a portion of my home and must insist on immediate correction of this intolerable situation.</p> <p>Utility Comment: I just found out what was going on today and am writing a similar complaint to them.</p> <p>Request of CPUC: Immediate restoration of the original safe analog meters - no more and no less. This is a public health disaster - did nobody find out if these SmartMeters were dangerous BEFORE they were installed?</p> <p>Utility Name: PG&E</p>

11/7/2011	11/21/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I worked for several years at a radiation-generating lab. Errors in dosimetry readings resulted in my coworkers and I receiving unquantified doses of radiation during the course of our employment. As a result, my health professionals strongly advise me to avoid all unnecessary radiation exposures. Accordingly I and my family members avoid cell phones, electric garage door openers, microwave ovens and other wireless or radiation-generating devices. I am concerned about health impacts from microwave radiation generated by the two smart meters PG&E installed on my house as well as other smart meters PG&E installed on my neighbors houses.</p> <p>Utility Comment: 1) I called the PGE smart meter (SM) phone number on 1/12/11 and told "Adam" my concerns. He said there is no way to opt out of the SM program, but that SMs are "safe." He didnt know what "radio frequency" (RF) meant, and he misinformed me about how often SMs transmit. 2) On 2-25-11 I posted a comment on PG&Es SM facebook page asking PGEs response to an article about RF and brain activity (attached). PGE deleted my comment. I posted again asking for a responsible person (attached) and was stonewalled. 3) On 2-23-11 I posted "Negative Feedback" on the PGE SM website (attached) and received no response. 4) On 5-5-11 I submitted an "Inquiry" on PG&Es main website describing the situation and asking for help (attached). Three days later I received an email from PG&E telling me to call the SM phone number (attached).</p> <p>Request of CPUC: I would like CPUC to advise me what options are available to me regarding removal of my smart meters. I would also like to know how CPUC will support my actions. On September 22, 2011, CPUC Commissioner Michael Peevey stated publicly that PG&E will provide for an individual with demonstrated health impacts to go back to the analog meter. I assume this provision applies to those of us particularly sensitive to radiation as well.</p> <p>Utility Name: PG&E</p>

11/10/2011	12/12/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: Several months ago, a Smart Box meter was installed on my property. I was not aware that this was to occur until I received a notice on my front door that this happened. The box is located outside near my bedroom. Since this time, I have had ringing in my ear, difficulty sleeping, headaches. I researched to find out more information about this meter. The radiofrequency radiation is affecting my health! Constant radiation is cumulative over time. I dont want to develop major illnesses from this. I was told by Edison that there is nothing they can do. I cannot move from my property. The Smartbox is not compatible with Solar panels. So what am I to do? There should be some recourse or choice. I am an AMERICAN citizen, I pay my taxes, pay my bills, and my choice has been taken away, and I was not informed or given an opt out. Can you help?</p> <p>Utility Comment: I contacted them on Nov 9, 2011. They stated that all they would do at this time is to put my name on a list of people who wanted the boxez removed. One for those who have it installed and one list for those who dont have it installed yet. They said there was no one higher to talk to at Edison. If I want to go further, then I could contact the Utilities company (you) and voice a complaint. They said they are just collecting names and dont know what if anything they will do. So I am filing a complaint and want my box changed back.</p> <p>Request of CPUC: I would like the CPUC to have Edison change my box back to the original non smartbox. I would really appreciate anything you could do. Thank you so much. I would like you to contact me with an update on what can and will happen.</p> <p>Utility Name: So Cal Edison</p>

11/14/2011	11/28/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: I am very frustrated and concerned about the Smart Meters recently installed. I have been battling severe head pain that started when the meters were installed. I have spent hundreds of dollars on doctors' bills to find the source of pain to no avail. Since the installation I have been hearing a horrible humming sound that vibrates our house. I have lost sleep; have headaches, hair loss, and ear pain. I cannot stand this anymore. I now realize that the meters are the source and after reading about them I DO NOT WANT ONE! I insist it be changed back to the analog meter and should not be forced to have this meter. Please do not tell me I have to keep the Smart Meter, which is harmful. Had I known the truth before the meter was installed I would have demanded it not be installed. According to federal law this was an opt-in meter, which I did not know before so now I am opting out. The horrible humming is reason enough to change the meter now!</p> <p>Request of CPUC: Change my meter back to analog. Utility Name: SCE</p>
11/14/2011	11/28/2011	Pacific Gas & Electric Company	NULL	The consumer opposes the installation of the smart meter, due to health reasons. Sent smart meter closing letter.
11/15/2011	11/22/2011	Pacific Gas & Electric Company	NULL	The consumer opposes the installation of the smart meter due to health issue, wants meter removed. Sent smart meter closing letter.
11/15/2011	11/28/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: Smart Meters concern me. Here are some points I need to make: They individually identify electrical devices inside the home and record when they are operated causing invasion of privacy. They transmit wireless signals which may be intercepted by unauthorized and unknown parties. Most importantly: Electromagnetic and Radio Frequency energy contamination from smart meters exceeds allowable safe and healthful limits for domestic environments as determined by the EPA and other scientific programs.</p> <p>Utility Comment: They said that there are no provisions for me to "opt out" of this program and that I must contact you in order for you to consider instigating the "opt out" provision for customers who do not want the smart meters installed. WEB

11/16/2011	12/13/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: I am the tenant, the account is not in my name, however, I pay the bill and am subjected to the radiation emissions from the RF meter currently the house. Since it was giving me serious health effects, my landlady agreed to remove the meter, provided there was no additional cost involved. In a conference call with a manager at Edison, we were told the additional cost merely to go from the harmful RF meter to a safe analog meter would be approx. \$4,000 a year, with no increase use of electricity, just due to the way they bill for analog meters using Domestic/Time of Use rates. The situation of this meter has caused bad problems with landlord and myself as I have been forced now to SLEEP IN MY CAR WHICH IS ILLEGAL. However I cannot sleep in the apartment because of the meter.</p> <p>Utility Comment: They told me to either pay the extra approximate \$4,000 a year to have the harmful RF meter replaced with a safe analog meter, move out of the house I am in with the RF meter on it or move out of the state of CA since they planned on rolling out smart meters and not allowing people to opt out or in this case, without an outrageous cost. They also will not speak with me unless my landlord is on the line because the account is in her name. They told me I cannot get the account in my name or get my own meter unless something was done about the property. My landlord refuses to take any more calls about the meter, even though I am told she actually replaced her own RF meter with a safe analog meter upon hearing about the health effects!!!</p> <p>Request of CPUC: I would like the PUC to make Edison give me a safe analog meter without the additional \$4,000 cost or even any cost. It is extortion to charge people money just to retain their health or to avoid being made ill or given cancer or heart arrhythmia. I need the PUC to help me in this situation as Edison it totally out of control with their outrageous charges. My case may be different than many because of the way the account is not in my name, however, anyone who has a health complaint about the meter should not have to be exposed to them and should not be charged these exorbitant fees to get a safe analog meter back.</p> <p>Utility Name: Edison</p>

11/16/2011	11/30/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Today, a young man with a Wellington sign on his truck. He said that he was at my home to install a PG&E "Smart Meter". I told him I wanted to OP OUT and refuse to have a smart meter installed. He said that I could not refuse installation of a smart meter. I told him I was in the middle of a computer transaction and could not be without electricity. He said he would go to a few more houses and then come back in about 30 minutes. I contacted several people with the California Public Utilities Commission in the legal and energy departments and they said that I could OP OUT of the Smart Meter. They advised me to call PG&E and also file a complaint on the CPU website. I went outside to put up a sign to "Op Out" of the smart meter on my electrical meter and was met by the young man with Wellington, again. He said that PGE would tear off my sign and install the smart meter. He claimed that he had seen this happen numerous times.</p> <p>Utility Comment: Next, I called PGE and was routed to a Smart Meter agent named John. He took my information and complaint as stated above and said he would process a "Delay Install of Smart Meter " until the CPU commission reached a decision. John said that I will get written notified when that happens. I asked him to file a complaint against Wellington for their actions as stated above, especially giving false and misleading statements to a consumer, by saying I could NOT refuse installation.</p> <p>Request of CPUC: First of all, I appreciate the assistance of the two PUC employees that talked with me today. I would hope that the CPUC would have the power to protect consumer against unfair practices by PG & E in regards to the installation of "Smart Meters". It is up to the State of California PUC to hear what the public is saying. My foremost concern is that Smart Meters are not smart enough to prevent harm to consumers health. From what I have researched, the smart meters results in increase radiation and higher costs for electricity to the consumer.</p> <p>Utility Name: PG&E</p>
11/14/2011	12/13/2011	Pacific Gas & Electric Company	NULL	<p>The consumer opposes the installation of the smart meter due to health issue, wants old meter back. Sent smart meter closing letter.</p>

11/18/2011	11/29/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I have developed PVC, a heart arrhythmia, due to the SmartMeter on my small house. Up to the time the SMeter was installed, my heart had never skipped beats. At first, my heart skipped beats only when I was sitting on my living room sofa, about 1-2 feet from the SMeter on the other side of the wall. It never happened anywhere else outside my house. The problem has become worse; my skipped heartbeats last longer after being near the SMeter. I went to an MD who diagnosed me a couple of weeks ago with PVC (premature ventricular contractions), a serious health problem. Query: I take my pulse fairly often as part of treating myself with Chinese Medicine, so I was able to tell early on that my pulse was skipping beats, and was able to tell that it only happened when near the SMeter. How many people are going to their docs 6-12 months after having a SMeter installed, with arrhythmia, but who have no idea that it was caused by the SMeter? I am afraid I am just the tip of the iceberg.</p> <p>Utility Comment: I called PG&E many times in Jan 2011 when I first became aware of the skipped heart beats. I called PG&E again a few weeks ago, and talked to Regina James, who told me she was making an "escalation" report, based on the escalation of the health problems I had related to them in Jan. 2011. Tom Smith eventually called me from PG&E and said PG&E was legally unable to take anyones SMeter out without a CPUC order.</p> <p>Request of CPUC: I want the CPUC to order PG&E to take out my SmartMeter and replace it with an analog meter. My health, and possibly my life, are at stake.</p> <p>Utility Name: PG&E</p>
11/17/2011	1/11/2012	San Diego Gas & Electric Company	NULL	The consumer is writing for her neighbor who is 90 years old. The consumer opposes the installation of the smart meter due to health and safety issues. Sent smart meter closing letter.

11/19/2011	1/11/2012	Southern California Edison Company	NULL	<p>Complaint / Concern: SMART METERS are DANGEROUS!!!! I am deeply concerned about the unhealthful nature of these smart meters that were IMPOSED on us! We recently moved into a new home with a smart meter, and I immediately began having strange health symptoms. I am not only concerned for myself, but for my three precious children, all of whom are in varying stages of growth, both physically and mentally. It pains me to think that a device, of which I was told CANNOT and WILL NOT be removed from my home, is emitting VERY dangerous radiation from radio frequencies to and from the utility company... all in the name of "energy savings." The power company will, no doubt, profit from everyones present and future illnesses. To have not been given a CHOICE whether or not to keep our old analog meter and IMPOSING a RADIATION EMITTING smart meter on us is CRIMINAL. It is Un-American. They took our FREEDOM from us!</p> <p>Utility Comment: Southern CA Edison said that they WILL NOT remove the Smart Meter.</p> <p>Request of CPUC: Before insisting that the utility company has a so-called "right" to place a DANGEROUS device on FOURTEEN MILLION CALIFORNIA HOMES, more research should have been done on not just the ENVIRONMENTAL impact, but the HUMAN impact! We had an independent contractor measure the RF emissions from our Smart Meter (which happen about once every 1-2 minutes), and they results were DIGUSTING. Approx. 800-2000 mw!!!! That is CRIMINAL! You wouldnt live next to a cell phone tower, would you? Well, thats what SoCal Edison has done. It has basically installed a cell phone tower on 14 million homes, without our permission!!!! WE WANT THIS RECALLED IMMEDIATELY!!!! WE WANT ALL SMART METERS REMOVED FROM EACH AND EVERY HOME IN CALIFORNIA!!!!</p> <p>Utility Name: Southern CA Edison Electric</p>
11/18/2011	12/14/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: A smart meter was installed on my property with out my knowledge or permission. 11/29/2011	1/11/2012	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: Non-response from PG&E reps who were supposed to provide information. The latest example: a letter to Sidney Bob Dietz II dated Nov 12, 2011, ccd to Paul Clanon and Karen Clopton. The letter asked for clarification of statements made by Mr. Dietz on Nov 10, CPUCs regular meeting. Mr. Dietz was directed to this meeting with customers by Com Peevey. This is the latest in a long period of threats, misinformation or silence employed by this company to ignore ratepayer concerns. Neighbors not wanting Smartmeters were threatened and told their power would be cut. Requests for Delay Status were ignored. Utility reps told by Peevey to respond (verifiable in CPUC video archives) got no answers: phone msgs ignored, impossible to contact these people who were supposed to help customers.</p> <p>Utility Comment: I asked Mr. Dietz where PG&E gets authority to install unwanted wireless devices over rate-payer objections? He responded "It is in the Service Contract". My letter requested provision of the relevant the portion of Service Contract; where to find this Contract; definition of the point at which PG&E asserts customer has entered into a contractual agreement. I have received no answer.</p> <p>Request of CPUC: I would like the answers to my three very clear questions in order to determine what legal right PG&E is assuming by these installations. Until this assumption is provided and proven to survive legal challenge, I would like installations halted and forced installations reversed: digital meters of all types (including opt-outs) emit pulsed radiation that is producing both apparent and latent health effects. I would appreciate the Commissioners acting as though they represented rate-payers, not the profit-making entities they were tasked with regulating. There is precious little service-providing going on at the CPUC and plenty of blame and shame for the entire agency to shoulder.</p> <p>Utility Name: PG&E</p>
11/29/2011	1/13/2012	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: I am adamantly against any form of EMR radiating smart meter installed on my home. I am EMR sensitive and moved to a rural area to escape the bombardment of EMR. I have also researched the ill effects of EMR and documented it on the website: www.celltowerdangers.org. At the moment I must keep my property locked up so no one can install a meter. I have a number of friends who have been ***totally incapacitated*** healthwise once smart meters were installed on the wall outside their bedroom- and without their knowledge.</p> <p>Request of CPUC: I want everyone to have the basic right to have utility meters that do not radiate EMR in any shape or form.</p> <p>Utility Name: SDG&E</p>

11/30/2011	1/12/2012	Southern California Edison Company	NULL	<p>Complaint / Concern: On or about July 21, 2011 a white unmarked pickup truck pulled up to my locked (with a chain and combination padlock) gate with a NO TRESPASSING sign in plain sight. A man got out of the truck and came to my gate. I asked him what he wanted and he indicated he was there to replace my mechanical analog electric meter with a smart meter. I told him we did not want a smart meter because of the surveillance and health issues associated with the smart meters. He told me he would have a sheriff come with him and force me to allow the meter swap (a lie). I told him fine bring the deputy and I would tell the deputy the same. With that he got into his truck and drove away.</p> <p>Utility Comment: I sent Southern California Edison (delivered on 7/25/11) United States Postal Service Certified signed Letter with return receipt requested #7009 3410 0000 6843 8023 to Southern California Edison P.O. Box 800 Rosemead CA.91770</p> <p>I indicated I would not allow a smart meter to be installed on my property and electrical account and should they install one I would press trespassing charges and hold them monetarily responsible for any and all physical and mental damages as well as property damages associated with their smart meter.</p> <p>To date I have had no reply or correspondence from SCE other than my monthly statement.</p> <p>Request of CPUC: Stop the roll out of this smart grid/smart meter debacle. I know the smart meter program is an Opt-In, not an Opt-Out program. The only places the installation of smeters is mandatory are in federal buildings.</p> <p>The installation of these smart meters and their associated collector systems are a 24/7 health and surveillance danger to us all and they lower my property value. This is also a California State Constitution and Federal Constitutional issue. I am within my rights under the CA State Constitution to use what ever means at my disposal protect myself, family and property from any such incursion I deem a danger to me, my family and my property.</p> <p>Utility Name: Southern California Edison</p>

11/30/2011	1/12/2012	Southern California Edison Company	NULL	<p>Complaint / Concern: Help me! My heartbeat has been very rapid and it seems as though its getting worse-especially in the evening and early morning hours before I go to work. I have had insomnia for over two months and that is getting worse also. I live in an apartment building that has 6 Smart Meters. There are Smart Meters on the apartment buildings on either side of the building that I live in, also. There are apartment buildings all down the street on both sides of the street. Every building has Smart Meters!!! I visited a friend in a different town who does not have a Smart Meter on his home. This was last week for 3 nights for the Thanksgiving Holiday. I had no insomnia and no rapid heart beating. The symptoms began again when I came back home. PLEASE HELP!!</p> <p>Utility Comment: The utility company said that they had no opt out measures at this time. They told me that I should contact the CPUC. I was told that there was an "Re-education Department" that I could contact within their company which would tell me that Smart Meters do not cause any problems. I was also told that the effects of Smart Meters are no worse than cell phones, portable phones, or microwaves.</p> <p>Request of CPUC: I want the Smart Meters taken off the building where I reside and have the old analog meters put back on. And if this doesnt completely address my health concerns, then I would additionally want the Smart Meters on the buildings next to where I live replaced with analog meters. PLEASE help me!</p> <p>Utility Name: Southern California Edison</p>

11/30/2011	12/16/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I was told in a letter by PG&E that a Smart Meter would be installed on our property. The letter explained that the meter would be communicating with all appliances in our home and send the information to a central unit nearby. This communication would be through wireless frequencies. While I understand that my utility is trying to cut jobs for meter readers by eliminating the need for them through this wireless technology, I am very concerned about the exposure to these electro-magnetic frequencies for myself and my family. I have done extensive research on the effects of EMFs and have tried to minimize our exposure to them.</p> <p>Utility Comment: Therefore I called PG&E to tell them I did not want this pollution in and around my home. I was told - rather rudely - that I had no choice in the matter and that the meter would be installed anyway over my objections.</p> <p>Request of CPUC: I want the CPUC to give consumers the option to decline the Smart Meters and continue using the existing meters or another system that does not add to EMF pollution.</p> <p>Utility Name: PG&E</p>

EMAIL

12/2/2011	2/6/2012	Pacific Gas & Electric Company	NULL	<p>From: Sent: Friday, December 02, 2011 9:21 AM To: Peevey, Michael R. Cc: Subject: CPUC - PG&E Smart Meter Opt Out Fee Proposal</p> <p>Mr. Peevey, RF exacerbates my illness. Please consider the people negatively impacted. I, for one, cannot afford further health decline or the proposed \$90 opt-out fee, as well as, a \$15 monthly fee for your choice of a wireless mesh network to host your smart meter project. I don't know who on this project missed the boat in thinking it through thoroughly and early on when the public concerns were brought forward. People who are more electrosensitive need to be granted a "NO FEE" option and "reasonable accommodation" of at least a 300 foot "smart meter free zone" around their homes. Respectfully, Ec: Governor Brown</p> <p>On Nov 3, 2011, at 11:44 AM, wrote: Honorable Judge Amy Yip-Kikugawa, I have contacted the commissioners previously on the smart meter issue. Today, I approach you regarding a workshop response. Diagnosis states: suffers from the Central Nervous System effects related to Chronic Fatigue Syndrome. Possibly with an autoimmune basis with possible deleterious effects from ambient high levels of EMR (or low level (RF) - long term). During the workshop you pointed out that EHS is not recognized by the ADA, however, CFS is. As a person recently diagnosed with a chronic health issue exacerbated by radio frequency waves, day to day living poses many challenges in today's wireless world. Understandably, the debate rages on both sides. In today's climate, there are many who are stuck in the middle, quietly and patiently hoping for reason and common sense to override corporate and political power. Limiting time near radio wave output proves to be a very challenging task. I do my best to stay clear of radio frequency and electro magnetic fields to give my body time to recover, which means I can no longer do my job as a wireless services technician and it limits the possibility of finding another. I have gone through all the phases of grief, from denial to acceptance and back. Unfortunately, the cycle will not end until the debate does. Even then, depending on which side wins, the risk to those in the middle is a question mark. In the mean time, cell towers continue to be placed and smart meter wireless grids saturate neighborhoods, always on 24/7. The grim truth is that radio frequency whether ionizing or non-ionizing is still radiation. Paraphrase: Everything is a poison. It is only a question of dose. Paracelsus 1493-1541 Remove the "junk science" from the picture and focus on the science available since the 60's, and built upon since that time. From what is known, the overuse of radio frequency low-level non-ionizing radiation technology is not wise. There is much more study needed to get the technology into a meaningful level, if at all possible. I was once a productive active member of the community, doing my part and happy to do so. I am now at the mercy of an industry forcing me to accept a product that my body cannot tolerate. That same industry says that it's not a problem, my current situation proves otherwise. Please stop and reverse the roll-out of the smart meter program. Do not allow the utility companies to charge customers who opt-out. I appreciate your time and professional attention regarding this matter. Respectfully,</p>

LETTER	12/1/2011	1/13/2012	Southern California Edison Company	NULL	<p>Referred to HAW - Removal of SMARTMETER</p> <p>1. This device collects and transmits private and personal data to undisclosed and unauthorized parties for undisclosed and unauthorized purposes. I do not give that consent. Smart Meters are by definition surveillance devices which violate Federal and State wiretapping laws by recording and storing databases of private and personal activities and behaviors without consent or knowledge of the people who are monitored.</p> <p>2. The device emits electromagnetic radiation which is a health concern.</p>
WEB	12/8/2011	1/13/2012	Southern California Edison Company	NULL	<p>Complaint / Concern: Yesterday SCE came onto our property and installed a "smartmeter". My wife is sensitive to radio frequencies and had migrain headaches from the smartmeter on our other house. Ever sense we moved the headaches stopped until yeaterday. We are asking for SCE to allow people to opt out of the smartmeter program for health reasons.</p> <p>Utility Comment: SCE told us that the meter will stay on the property until CPUC makes a decesion on opting out of the program. They told us that there is nothing they can do.</p> <p>Request of CPUC: I would like the CPUC to give residents the option of having an analog meter that does not sent signals/radio waves from it. This will protect the health and rights of the resident.</p> <p>Utility Name: Sce</p>
WEB	12/8/2011	1/13/2012	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I understand that the CPUC has a potential proposal in response to the outcry against the PG&E Smartmeter program that will require those customers opting out to pay an additional "meter reading fee". As one who is debilitated by EMF following a diagnosis of environmental illness these past 10 years I have no alternative but to opt out of the Smartmeter program and do not feel that I should be financially impacted by a decision that is medically necessary for me.</p> <p>Utility Comment: PG&E advised that the CPUC final decision was due in January/February of 2012.</p> <p>Request of CPUC: I request that the CPUC will consider the great savings that PG&E will reap from this technological change and make a part of the alternative choice a free one to those of us whose livelihoods and incomes have been cut short by our unhealthy reaction to cumulative EMF transmissions.</p> <p>Utility Name: Pacific Gas & Electric</p>

WEB

12/9/2011	12/19/2011	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I am writing to complain about the Smart Meters. I am one of thousands of people who have BECOME electromagnetically sensitive. I never had this problem before. Once the smart meters were installed in my neighborhood in Feb of 2010, I began to have a littyany of health problems: constant ringing in the ears, dizziness, confusion, trembling, pain in my eyes and above my eyes, anxiety, muscle spasms all over, insomnia and overall malaise. These devices are horrible and very dangerous. My husband and I have measured their frequency and strength of transmission and it is off the charts. They transmit every 10 seconds and at very high levels. The pulse RF continously. They made me sick and damaged my and my husbands quality of life. It became so bad, we left our house. We are saddened that the state would allow this w/o further research and providing proper shielding and distance alternatives for people. It is an outrage.</p> <p>Utility Comment: Initially PG&E told me they emitted radiation just like a microwave. Completely untrue - 100 times more powerful. They then said as long as we stayed 6 feet or more away from them, we were perfectly safe. This is impossible - the gas meter is less than 1 foot from our kitchen sink and the electric meter 3 feet from our kitchen table. Not to mention, our neighbors meters are only about 18 feet from us on either side. When I asked about having it removed, they said I could not. A month later, they said again that they were perfectly safe, just like a cell phone - untrue. I no longer use a cell phone and never use wifi. Now on their website they have a tidy little marketing piece on "understanding RF" and that as long as you are 10 feet away, you are safe. Interesting they now say 10 instead of 6 - basically admitting their is potential danger. Again, completely impossible to do in tightly packed Silicon Valley in small houses.</p> <p>Request of CPUC: CPUC needs to take action on this. Its completely unfair to people and is literally driving people from their homes. Where are our civil liberties? The opt out is bogus, though I would pay anything to have my home safer, the meter with the "radio off" still emits power spikes which cause dirty electricity inside the house which is dangerous. There will be people who get very sick from this. I hope not to be one of them. They are polluting a beautiful state that I once loved.</p> <p>Utility Name: PG&E</p>

12/11/2011	1/18/2012	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: My smart meter concerns me. I want it off my home and have my analog meter put back on. I have emailed you before and have not heard anything back. I have seen two doctors and found out that I have tinnitus and a hearing loss in my left ear (which faces the smart meter when sitting at my desk). I suffer from lack of concentration, clumsiness, the inability to multi-task like I used to, and fatigue. Im tired all the time and the ringing in my ears will never go away. Ive lived in my home since 1973 and its never made me sick before.</p> <p>Utility Comment: They lied. One girl in the front lines (who answered my call) told me the meter was CPUC mandated. I told her not to lie to me that I was knowledgeable on this topic and it was not. None of the people I spoke to could give me a straight story and it sounded like they were reading from a script, had no heart, no concern for my safety and it was just tough luck I had to put up with it. I finally met with a project manager and we are in the process of figuring out what it will take to move my meter further from my home. I have land and the option that most do not.</p> <p>Request of CPUC: I would like the CPUC to make available to us consumers the old analog meter. We should not have to tolerate the health issues that SDGE is forcing upon us.</p> <p>Utility Name: San Diego Gas and Electric</p>

WEB	12/14/2011	1/12/2012	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: SmartMeters and the way PG&E is handling a few customers that are asking for their analog meter back. The disregard for health issues and turning off electricity to houses after saying they would not!</p> <p>Utility Comment: They have a standard script that there is nothing that can be done once the SmartMeter is installed. Even if the opt out is approved and the customers with SmartMeters want to opt out, who will replace the SmartMeter that was installed (sometimes even when a customer said NO) w/o the customers permission or knowledge? PG&E representatives are saying it is too bad, but the SmartMeter is staying. When pressured, the PG&E representative will transfer you to another person who runs you around the same bush and transfer you again. So when does it stop? They say and I quote "When EVERYONE has a SmartMeter."</p> <p>Request of CPUC: Stop PG&E from cutting power to houses and stop the replacing of analog meters to smart meters until the opt out offer is complete. Mandating that PG&E put back the analog meters of those customers that had their meters changed and want to use the opt out option.</p> <p>Utility Name: Pacific Gas and Electric</p>

	12/16/2011	1/18/2012	Pacific Gas & Electric Company	NULL	<p>Complaint / Concern: I do not want a "smart meter" installed on my property. I am electro sensitive, as is my minor daughter. If we suffer symptoms common to these meters we will join a class action lawsuit against PG&E and the CPUC. If PG&E attempts to change our meter from the current analog one to a "smart meter" and attempts to demand additional charges either as a one time charge and/or ongoing monthly charge we demand our right not to have any kind or form of a "smart meter", we will join a class action lawsuit for discriminatory practices and the endangerment of our health. My husband, daughter, and myself are absolutely opposed to the removal of our analog meter.</p> <p>Utility Comment: An automatically generated call was made to our home by PG&E notifying us that we may be subject to these changes. I have made several calls to PG&E over the past year warning them not to install a so-called smart meter on our property. They say that they only allow a temporary opt-out time period.</p> <p>Request of CPUC: To take their mandate seriously. They are supposed to be protecting the well being of the public; this means looking at all of the science behind the threats inherent in these so-called smart meters impacting our rights to privacy, protecting our health, protecting the natural environment, and having the right not to be charged unfair and discriminatory over charges. To respond to and advocate, monitor, and protect the public's interest. Look at your governing charter.</p> <p>Utility Name: Pacific Gas and Electric</p>

2/11/2011	2/14/2011	Southern California Edison Company	NULL	<p>Complaint / Concern: On February 4, 2011 Southern California Edison installed a smart meter on our house an since that time my family has been miserable, especially my wife. My wife suffers from Lyme Disease and, as a result, has a compromised immune system. This past week she has suffered extreme headaches, brain fog, and intense body pain after the meter was installed. She has suffered from Lyme Disease for over two years and has not had symptoms to this severity in that two-year span. These intense symptoms began the day after our smart meter was installed. Since that time my 5 year old daughter, who is rarely sick, has complained of feeling dizzy when in her room or after taking a bath (both her room and her bathroom are on the same side of our house as the smart meter). She has not had these symptoms before. I have also experienced headaches this week which is uncommon for me as well.</p> <p>Utility Comment: The first person I spoke with said that I could not opt-out of the program. A second person said that they would get back to me but have not as of yet.</p> <p>Request of CPUC: I would like the option of opting out of the smart meter program and have the old wired meter re-installed on my home.</p> <p>Utility Name: Southern California Edison</p>

11/3/2011	11/4/2011	San Diego Gas & Electric Company	NULL	<p>Complaint / Concern: I have autnomic nervous system damage and asthma. I am recognized under the Social Security Administration as 100% disabled. The nerological damage causes sensitivity to electrical and radiation sources. Our home is in rural San Diego County at the end of a 1/2 mile dirt road with very few homes surrounded by BLM land and Vista Irrigation District land. Smart meters have been installed in the area, although not on our home. We plan to go off the grid if analogs are not allowed to be retained through opt out . Because of my disability recognized under the ADA and Social Security Administration, I have been very ill to the point I have had to leave my home on October 21 and stay in a hotel nearby. With the addition of more and more infrastruccion and smart meters on our little dirt road, my home has become uninhabitable by and I have incurred expenses of hotel, professional to measure fields and radiation in neighborhood.</p> <p>Utility Comment: I have contacted SDG&E and explained the problem to them. Today I received a call there is nothing they can do. The medusa or "mother ship" as they call it, a more powerful collector smart meter is directly next to our property. Additional meters have been installed to the point, now I cannot stay on our property more than a few hours without severe illness thus I have lost the use completely of the property. SDG&E refuses to make an accommodation it appears. Although the employees that came out were very sympathetic and tried to find a way to move some of this radiation emitting equipment further away from my home.</p> <p>Request of CPUC: I would like the PUC to order SDG&E to work with the customer to make an accommodation that reduces the rf an radiation on my property so I can use my home.alternately I would like the PUC to Order SDG&E t remove all smart meters and smart grid equipment from XXX and XXX. This is only a total of approximately 16 houses. A meter reader would only take not more than an hour to read the few meters on the short 1/2 mile dirt rural rd. Thanks for your consideration. Attached is the letter sent to SDG&E in March and NOvember as well as phsysicians letter confirming disability.</p> <p>Thank you XXX</p> <p>Utility Name: SDG&E</p>

EMAIL

12/2/2011	3/27/2012	Pacific Gas & Electric Company	NULL	<p>From: XXX [mailto: XXX] Sent: Wednesday, November 30, 2011 11:43 AM To: Public.advisor Subject: 6 transmitting PG&E smart meters in our only pass to apartments and 5 feet under our.mlt.fwr.d.HAW XXX To: CPUC Public Advisor XXXX 505 Van Ness Avenue, Room 2103 San Francisco, CA 94122 San Francisco, CA xxx Phone: XXXX E-mail: XXX</p> <p>Subject: 6 transmitting PG&E smart meters in our only pass to apartments and 5 feet under our living room. This April PG&E replaced their 6 analog old electric energy meters with GE smart meters in the building I live in. All 6 smart meters are in transmitting mode (microwave RF). They are mounted on the flat surface of 2.25 ft x 1.5 ft on the wall of the only pass into the building. This pass is 4.5 ft wide. Also the distance between these smart meters and the floor of the apartment our family live in is 5 ft. This year I traveled abroad and was out of town July, August and almost all September. I returned home on September 25. Since my coming back home I experience periodic headaches and, recently, I found vision deterioration of my left eye (it turned to be posterior vitreous detachment in left eye according to examination by ophthalmologist made on November 17, 2011). To check up the level of microwave RF radiation from the said 6 smart meters I purchased electrosmog meter CORNET ED-25G and made RF intensity measurements in the pass where the said meters are located. I observed radiation intensity pulses about 100mW/sq.m and more, which is far not in the safety range according to the data table of CORNET ED-25G.</p> <p>My concern: 1. The existing configuration of 6 smart meters in the narrow pass couldn't be considered as 1 radiation source of point type model (in this model the dimensions of the source are considered negligibly small, so the intensity of radiation decreases proportionally to the square of distance to the source) because the dimensions of the flat surface where 6 smart meters are mounted (2.25 ft x 1.5 ft) are the same order of magnitude as the pass width (4.5 ft, so if a person stands in the middle of this pass the distance between the surface with 6 smart meters and the body of this person is 1.5-2 ft). In this case the radiation intensity in this person body decreases proportionally to the distance (not to the distance in square), and this radiation level is much higher than presumed. All the tenants of the building use this pass to go to or from their apartments (including children). Sometimes a person stands for a while in this pass (mail boxes are located on the wall opposite to the surface of smart meters). 2. As well as the apartment I live in is located only in 4.5 ft from the said surface of smart meters (only 2 times longer than the dimension of the surface of smart meters) the model of surface radiation source should be applied for consideration of radiation intensity in this apartment (decreasing proportionally to the distance, not to the distance in square). This could lead to excessive radiation level in this apartment compare to presumed. In view of the above I request the safety inspection of the particular smart meters application at the address: XXX Contact: Phone: XXX E-mail: XXX</p> <p>Supplement: Photos The front view of the building XXX. The pass to apartments. Apartment I live in is just above the pass. The door of 6 smart meters panel is open. The pass to apartments. 6 smart meters panel with closed door is on the left side, mailboxes are on the right side. 6 smart meters panel with open door 6 smart meters panel with closed door. Electrosmog meter CORNET ED-25G is attached to one +H643 of the smart meters for radiation level measurement. Electrosmog meter CORNET ED-25G took a measurement. The RF radiation level is much far beyond the safety range (+5.0 dB) Sincerely, XXX November 30, 2011</p>
1/7/2011	2/16/2011	San Diego Gas & Electric Company	Consumer claims there are health problems associated with the installing for the smart meter and are requesting the analog meter returned.	NULL

LETTER

WEB	1/14/2011	3/8/2011	Pacific Gas & Electric Company	NULL	Complaint / Concern: My bill for gas electric went from approximately \$110 for December,2009 to \$340 for the same period this year. This was after the installation of a Smart Meter. Everyone in my neighborhood has seen their bill double or triple. Utility Comment: They said they would check to see if meter is working. Request of CPUC: It is obvious there is something completely wrong with these meters.My energy useage miraculously tripled in one year. I want my old meter back until they figure out what is wrong eith these meters. Utility Name: PGE
